

Voorblad leergroep verslag CM

Welke leergroep heb je gevolgd? Volgde je alle sessies?

Illu & Foto 1 - Ik heb alle lessen behalve één les gevolgd wegens ziekte, maar die heb ik online ingehaald.

Wat heb je geleerd in deze leergroep? Wat is het belangrijkste dat je hieruit meeneemt? Wat ervaren je als positief? Wat is de meerwaarde hiervan?

Ik heb geleerd hoe je op de meest geoptimaliseerde manier met illustrator kan werken en illustraties kan maken. Ik heb verder leren denken dan de pen tool.

Welke moeilijkheden heb je ervaren? Wat heb je als minpunten ervaren? Wat lukt nog niet goed?

Precies werken met illustrator en precieze of meer optimaal werken en minder onnodige punten zetten is moeilijk.

Heb je tips of suggesties? Volgde je nog iets in zelfstudie?

Leuke lessen, alles was duidelijk.

Als je jezelf een score mocht geven op 5, hoeveel zou dat zijn en waarom?

4/5, Ik was mee met alles maar de moeilijkheden hiervoor gezegd zijn er nog steeds.

Welke documenten/bijlagen dienen als bewijsstukken?

Indien gevraagd voeg procesbeelden/screenshots, notities, logs en opdrachten toe.

Plaats alles samen in een document. Dien dit alles in als 1 PDF

Illustratie fotobewerking I – les 1 notities

Grafische vormgever taak wisselwerking tussen verschillende programma's, het is dus belangrijk om te weten welk programma wanneer te gebruiken

Crossmedia		Illustratie & fotobewerking	
	ILLUSTRATOR	• Illustraties • Logo's • Symbolen • Technische tekeningen • Verpakkingen • Letterontwerp (schetsen) • Lasercutter • ...	• Geen kwaliteitsverlies bij vergoting • één of meerdere artboards
	Vectorafbeeldingen en -illustraties maken		
	Werk met VECTOREN		
	PHOTOSHOP	• Foto's bewerken • Composites of collages • Digitaal schilderen • Mock-ups • Afbeeldingen voor web • Eenvoudige animaties • ...	• Beelden met een specifieke kwaliteit en afmeting • Een pagina maar meerdere lagen en transparantie • Niet-destructief bewerken dankzij maskers
	Foto's bewerken en afbeeldingen ontwerpen		
	Werk met PIXELS		
	INDESIGN	• Boeken en magazines • Posters • Brochures • (Naam)kaartjes • Verpakkingen • Interactieve PDF's • e-books • ...	• Combineren tekst en beeld • Typografie of teksten vormgeven • Documenten met meerdere pagina's en katernen • Automatisering zoals paginanummers, streepjeren en stijlen
	Lay-outdesign gedrukte en digitale publicaties		
	Werk met GELINKTE BESTANDEN		

Specifieke vormen uit vectoren (opgebouwd uit punten), gemaakt in Illustrator

Photoshop werkt met bitmaps, dus er is een kwaliteitsverlies mogelijk door de pixels

Indesign is voor alles met lay-out, publicatie (gedrukt en digitaal), werkt met gelinkte bestanden (bv. Logo uit photoshop linken in InDesign)

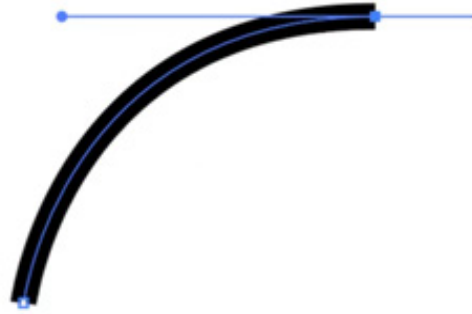

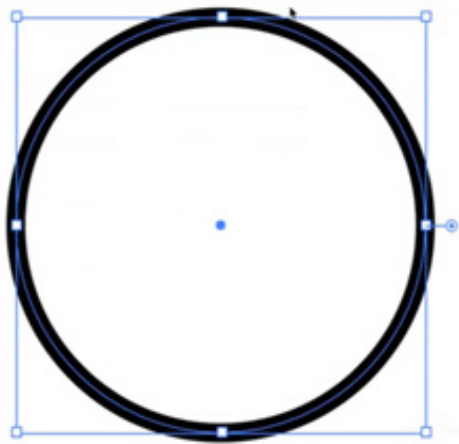

PPI (pixels per inch)

Web: 72 PPI

Scannen afbeelding op hetzelfde formaat: 300PPI (A3 inscannen moet bv. Terug afgedrukt worden op een groter formaat, dan moet je het laten scannen op een ander PPI (bv van 300 naar 600PPI (dubbel zo groot))

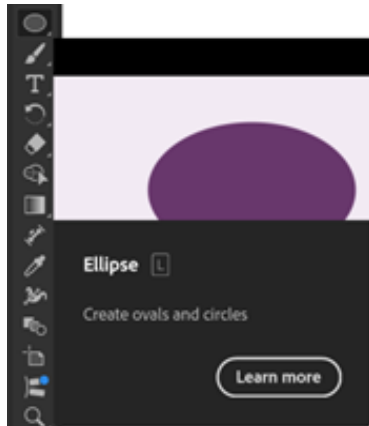

Spelen met de pen

De kunst is om met zo min mogelijk punten strakke en vloeiende vormen te tekenen.
Niet te veel ankerpunten plaatsen dus.

Cirkel bestaat dus uit 4 punten

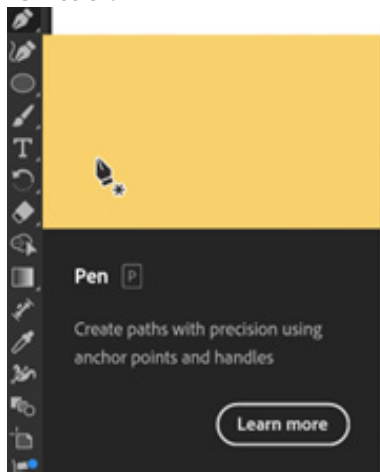

Shortcuts cirkel:

L

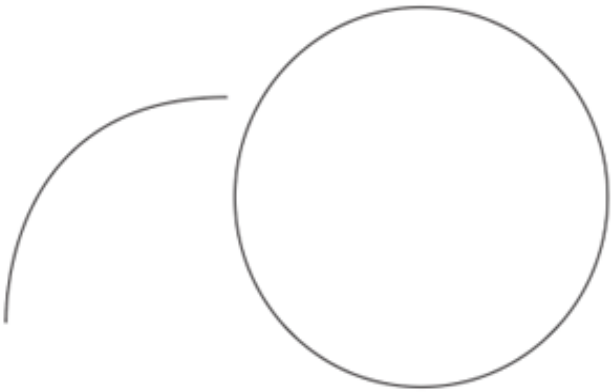

Perfekte cirkel:
Shift inhouden

Shortcuts boog:
Pen tool:

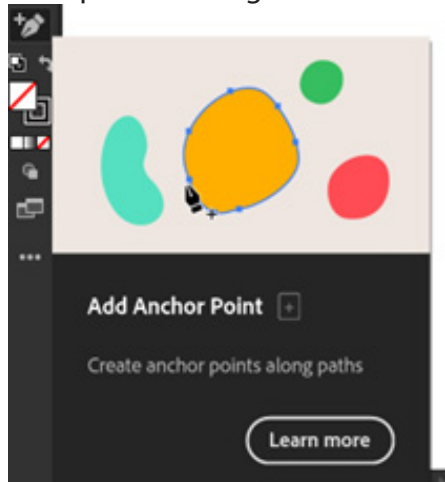

P

Lijn losmaken/afwerken:
Enter

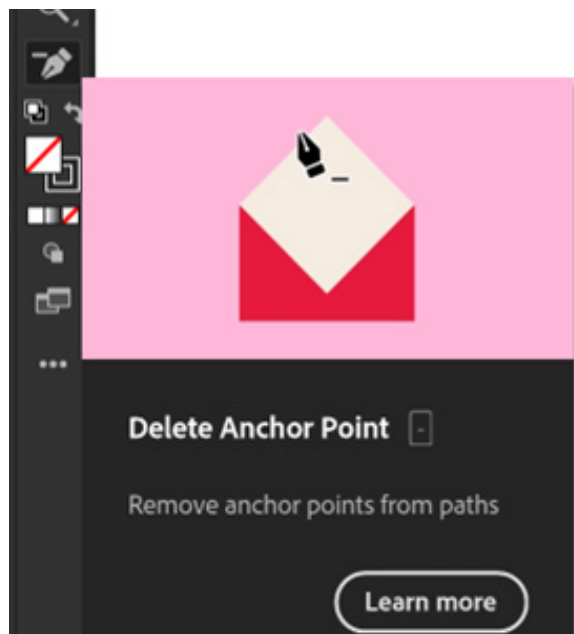

Shortcuts:
Ankerpunt Toevoegen:

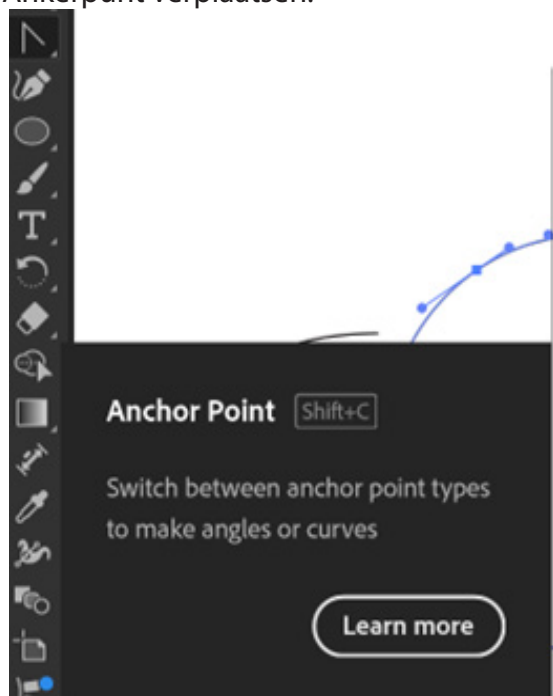

=

Ankerpunt Aftrekken:

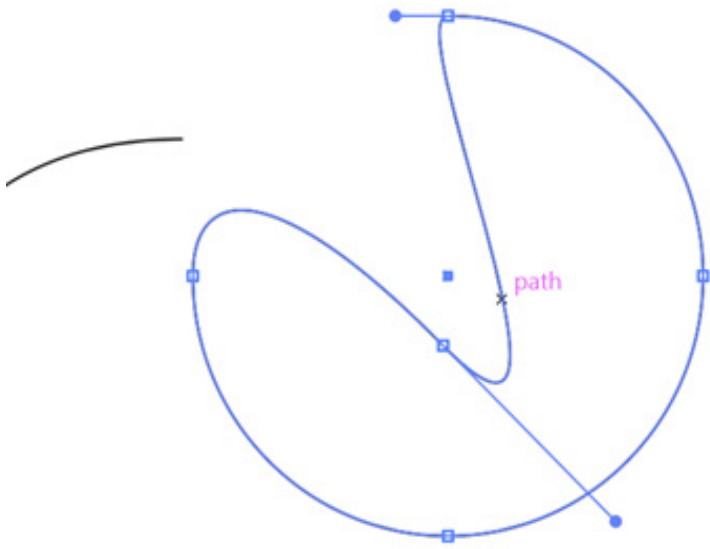

Shortcuts:

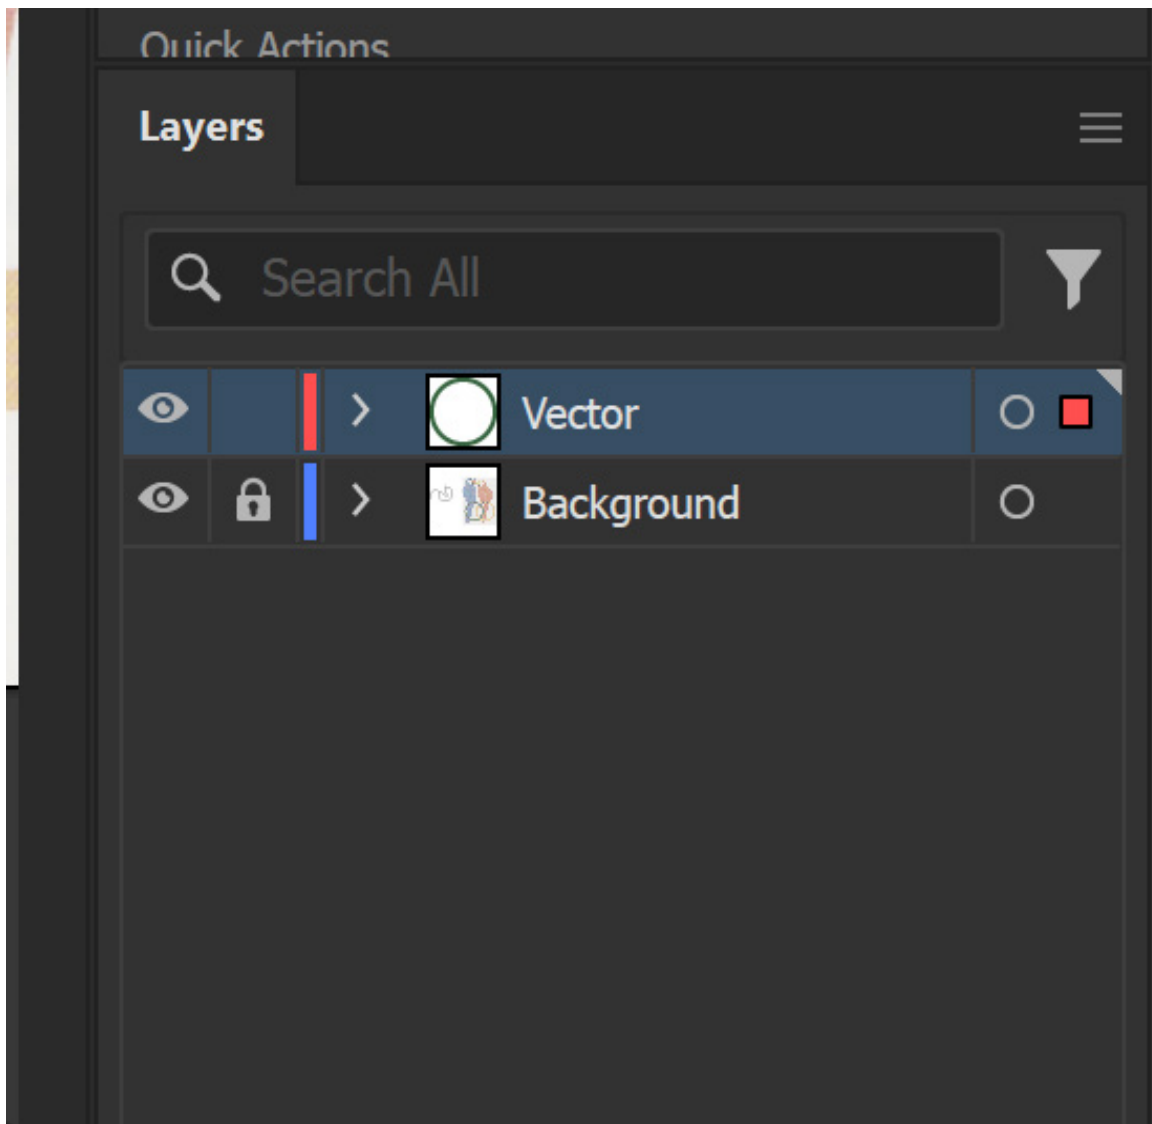

Ankerpunt verplaatsen:

Shift + C

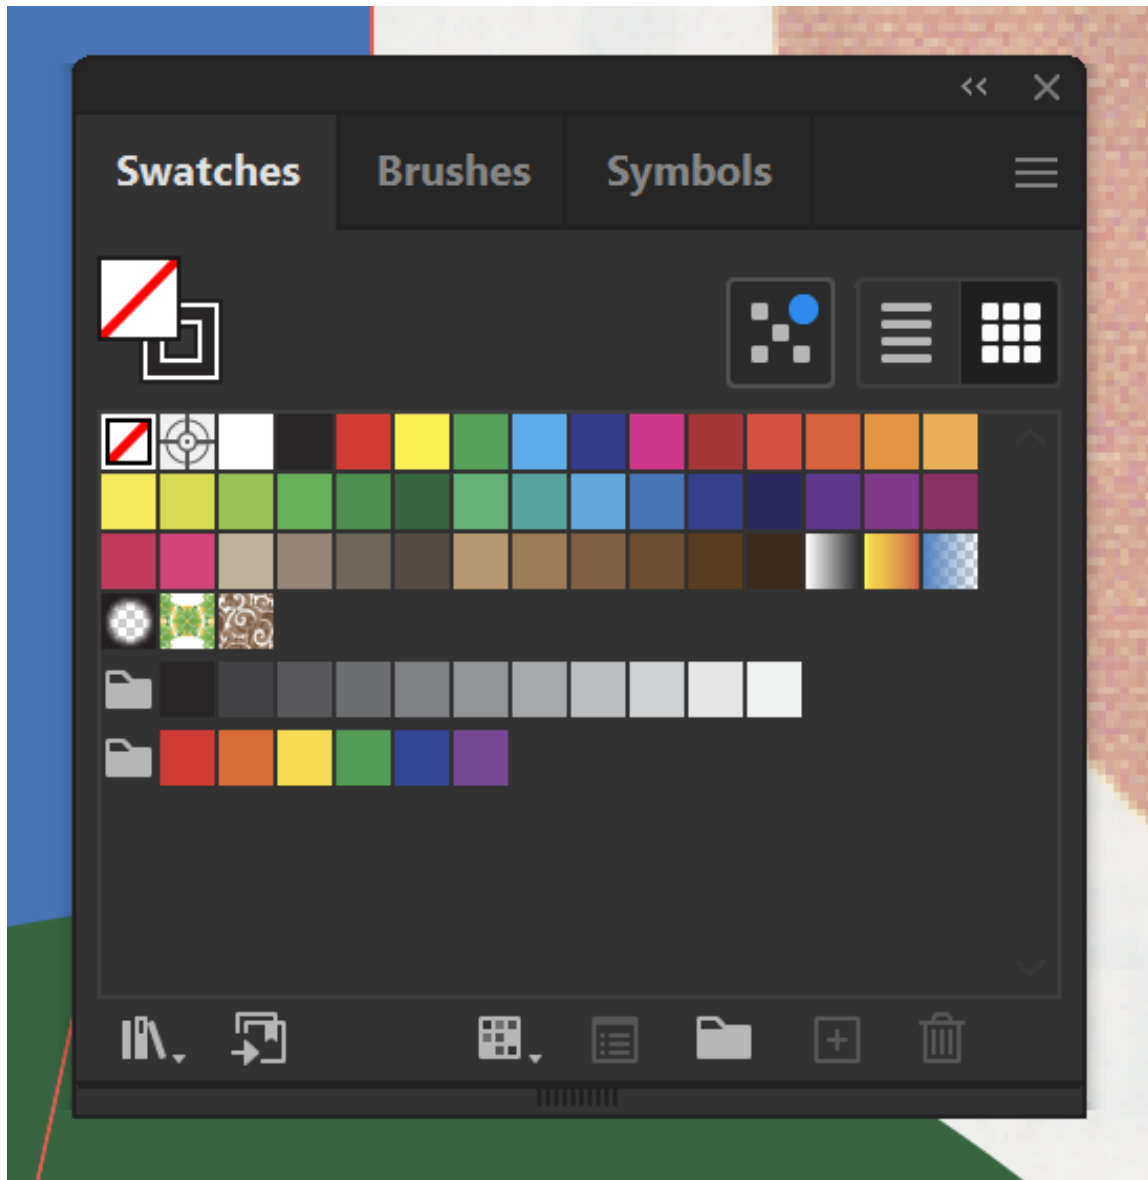

Opdracht 1:

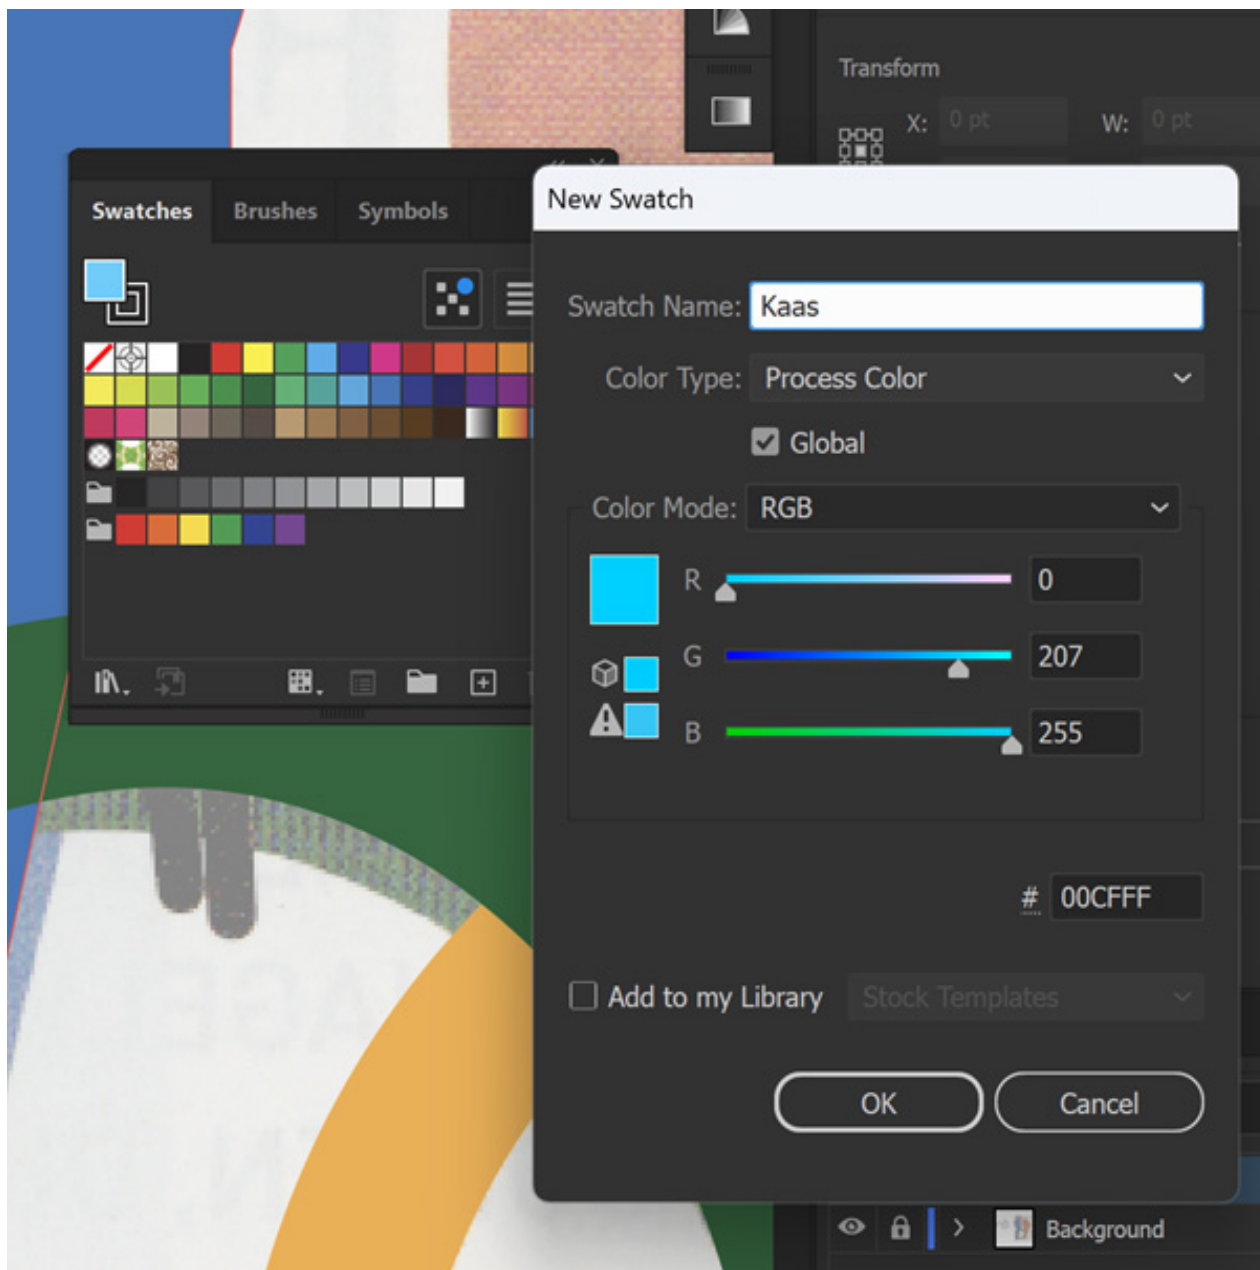

Opacity/dekking van afbeelding verlagen

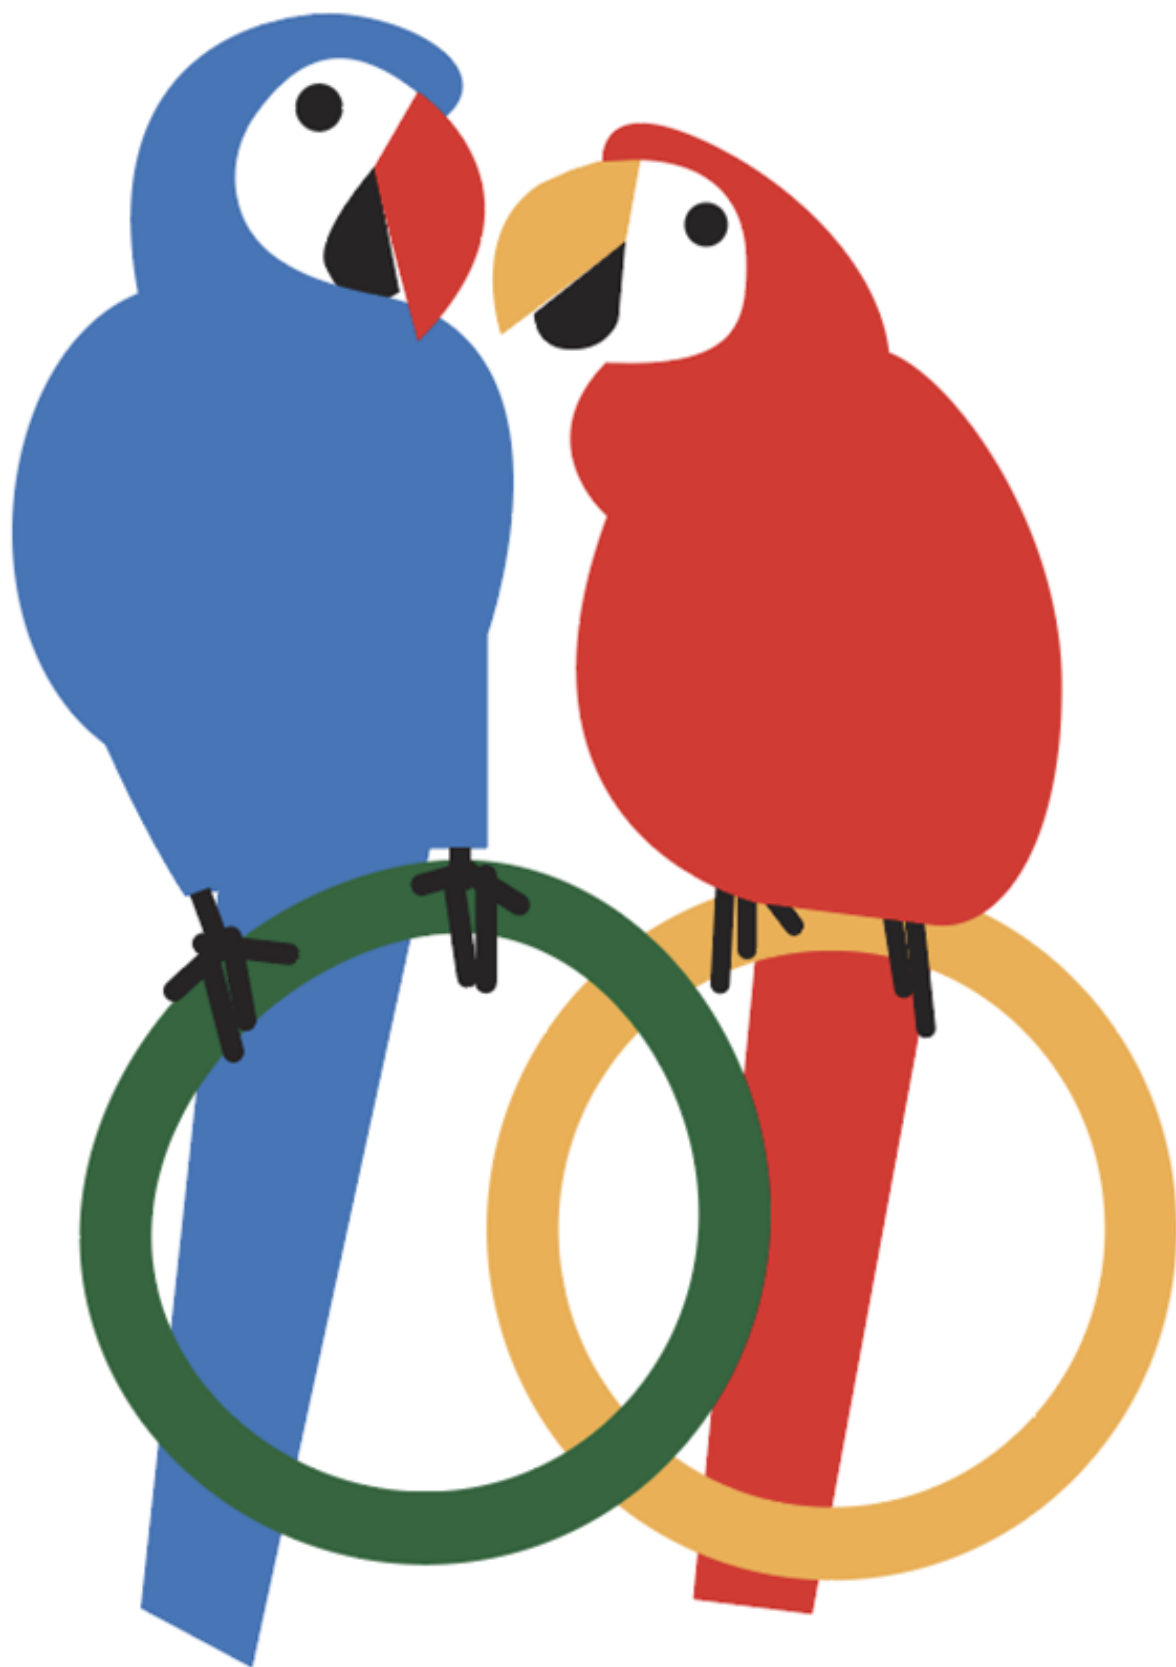

Stalen/Swatches te zien via Window > Swatches

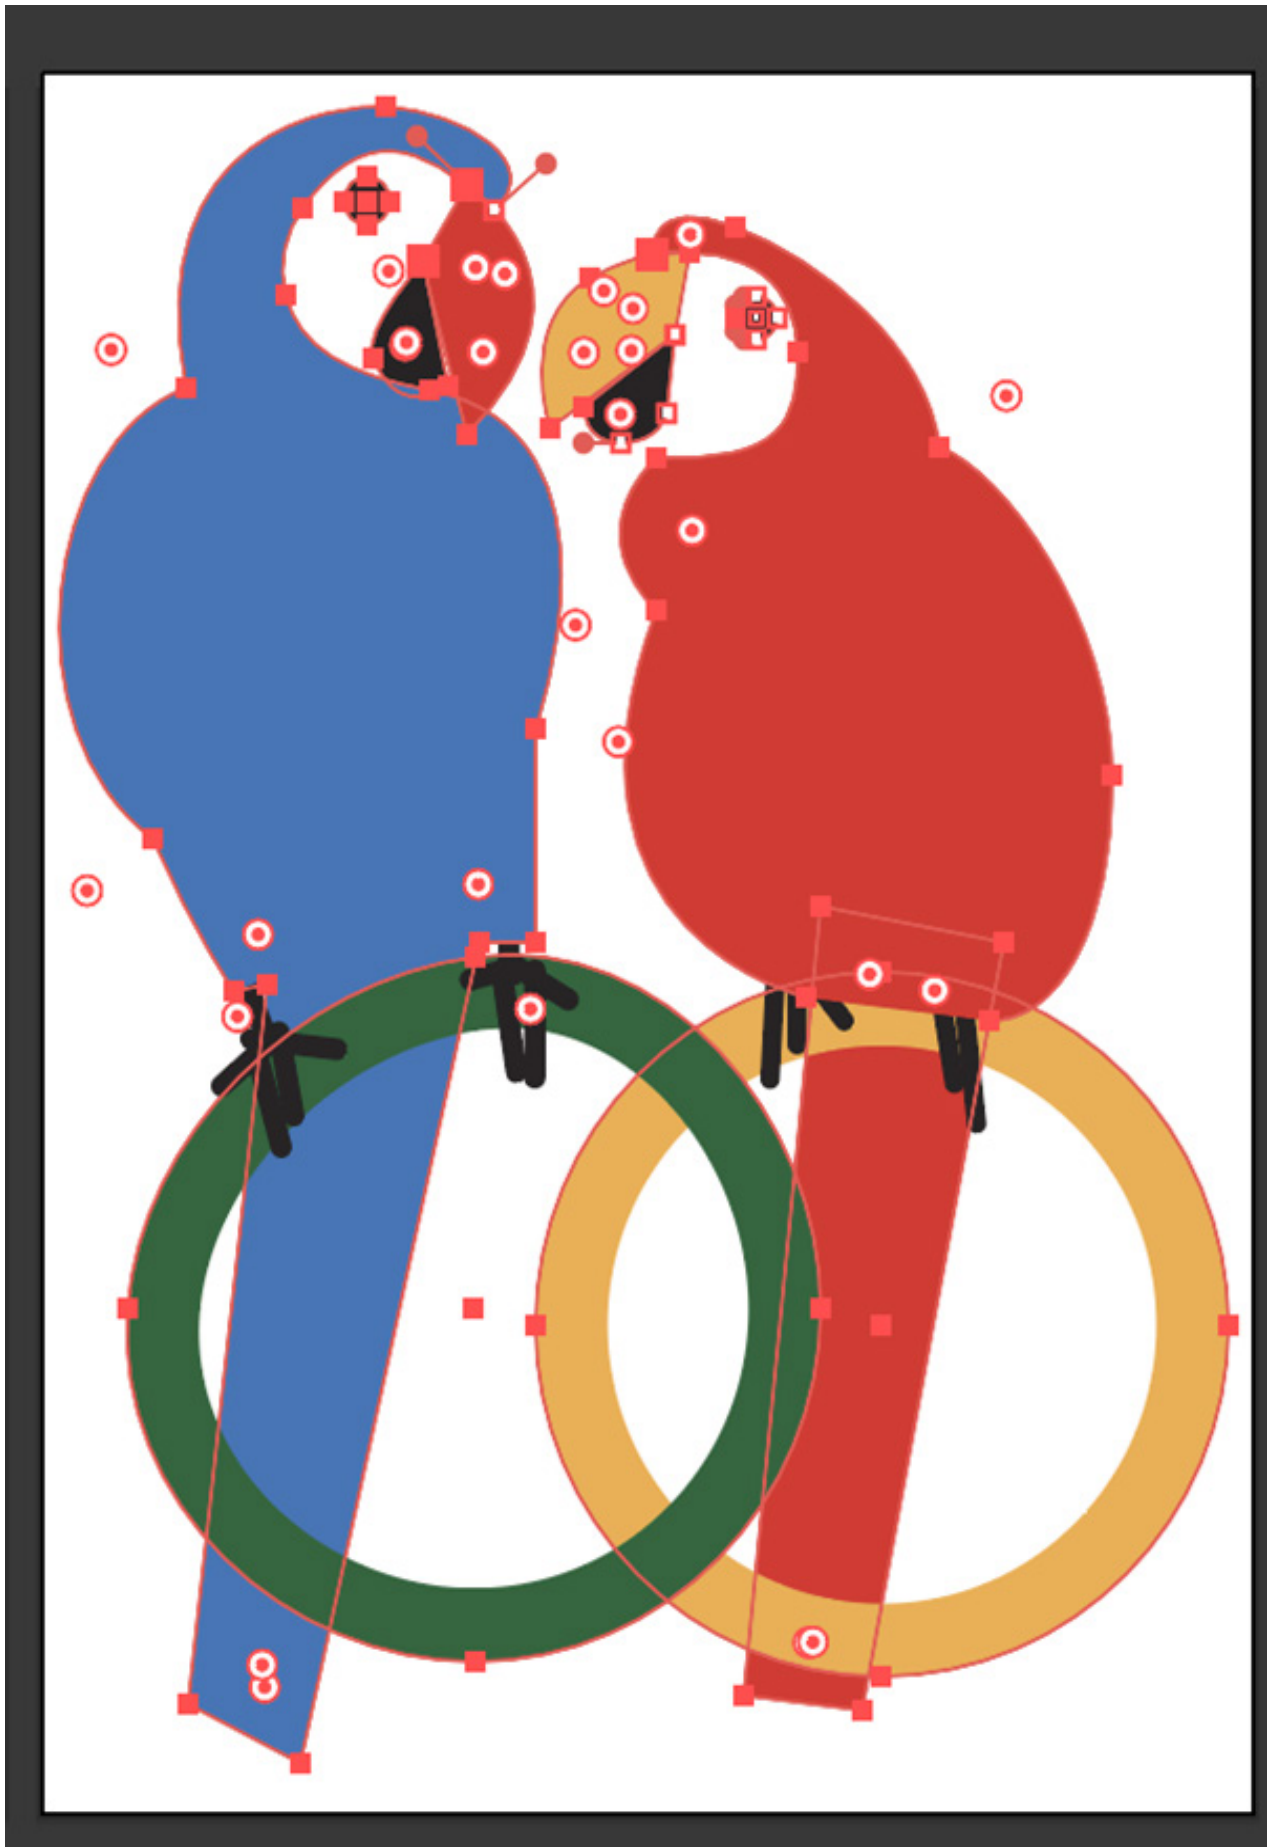

Kleur opslaan:

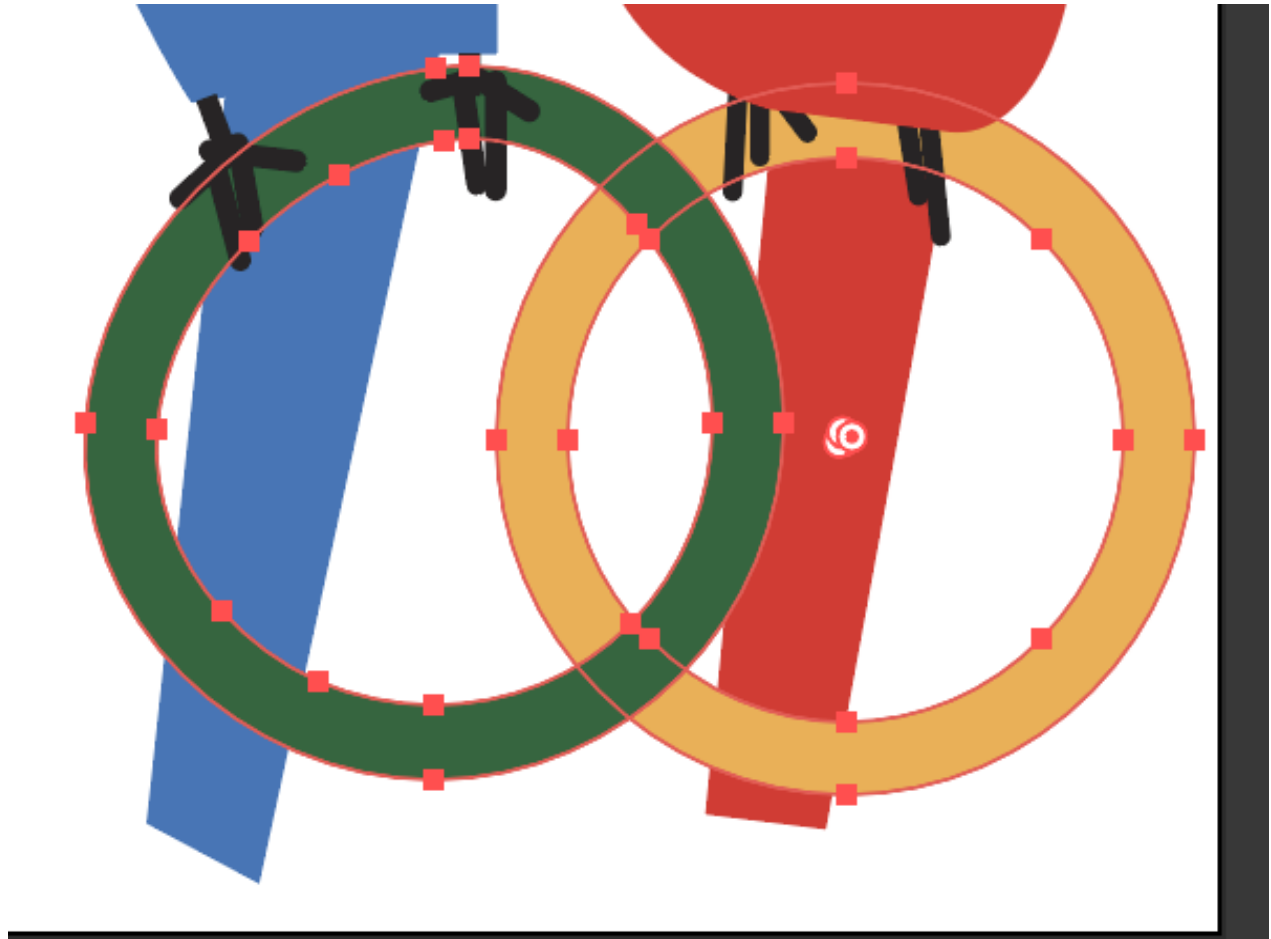

+ Drukken swatches en dan kleur een naam geven en opslaan

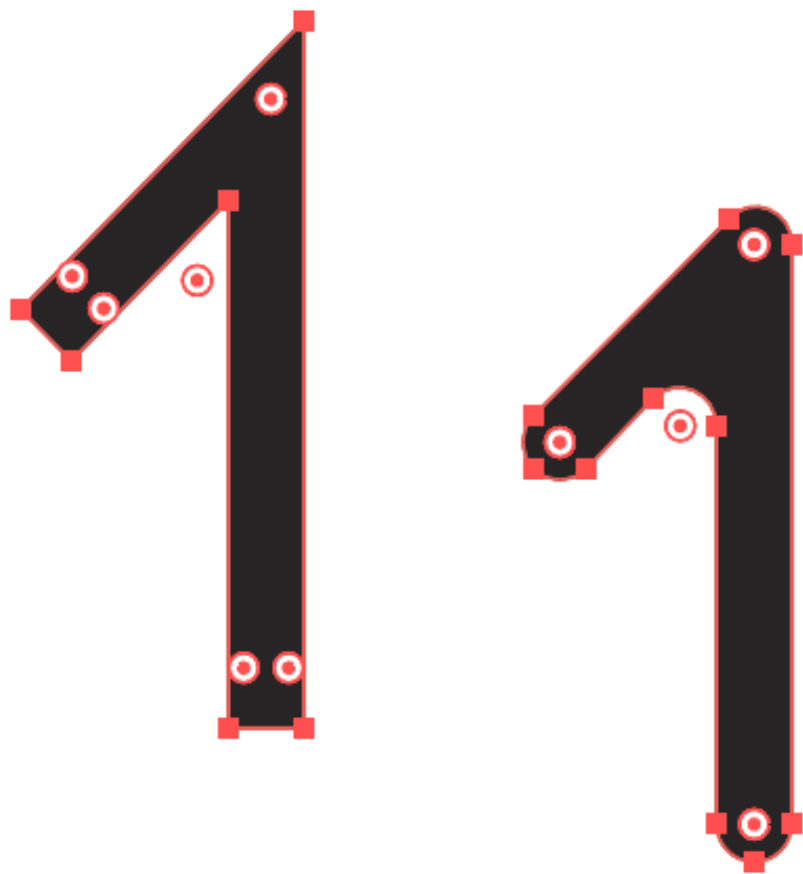

Van cirkel een vorm maken: Object > Expand

Ankerpunt ronder maken

Cirkels bewegen

Opdracht 2

SOON

Control wanneer een punt plaatsen zal de stokken van het punt bewegen

Pad uitsnijden (bv. Tussen 2 armen figuur hierboven): vorm maken om uit te snijden en via pathfinder verwijderen

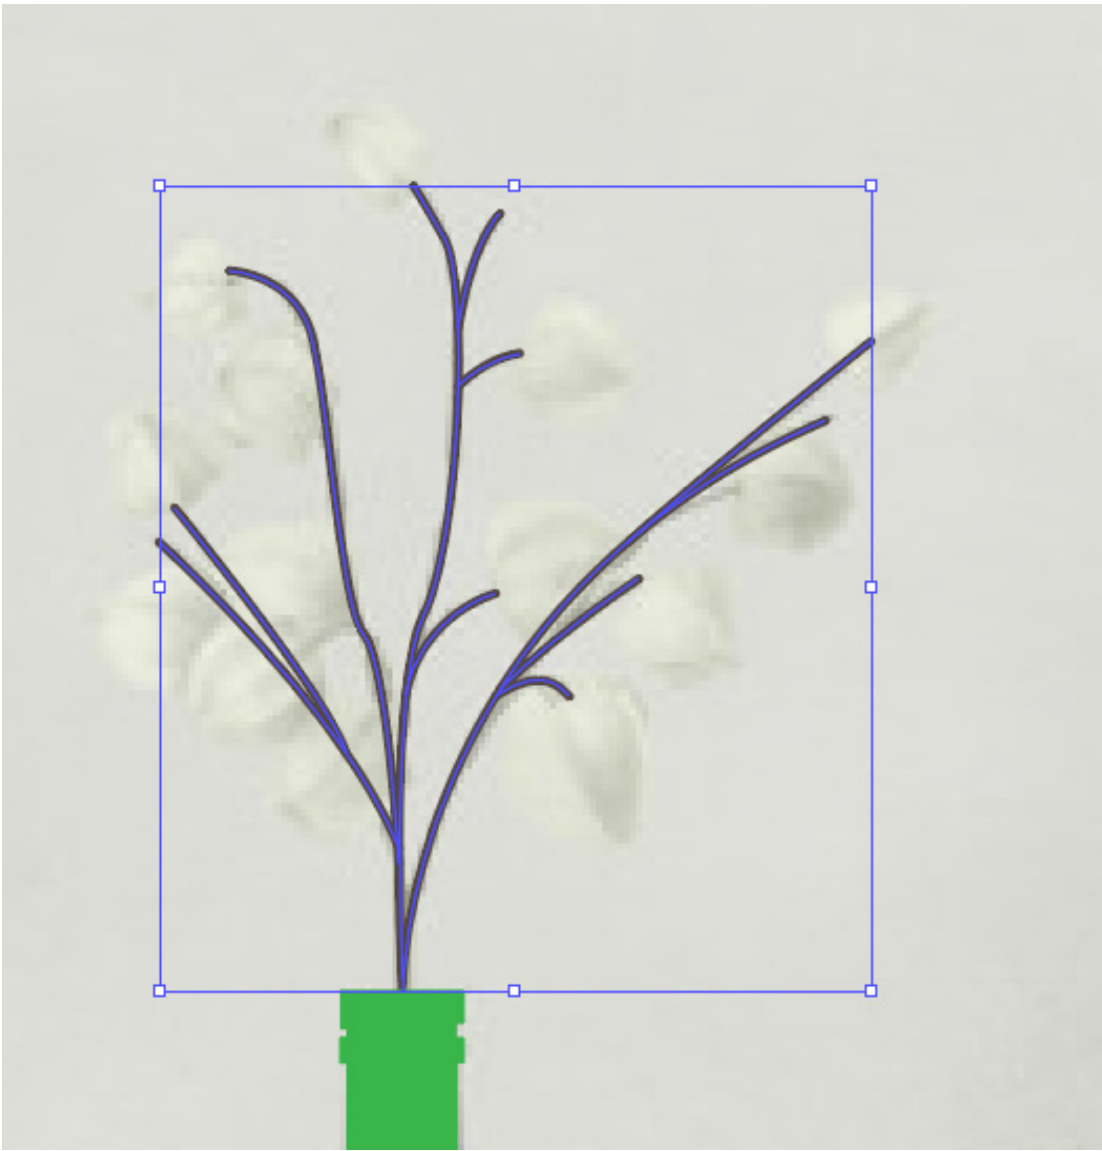

Indienen

PDF + screenshots + verslag

Les 2 opdracht: grafisch stilleven namaken

Illu & foto bewerking I - Les 3: spelen met vormen

Shaper tool

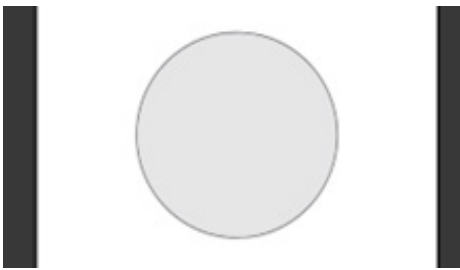

Vormen tekenen, waar een geometrische vorm van gemaakt wordt.

Shift + N

Dit:

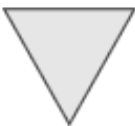

Wordt:

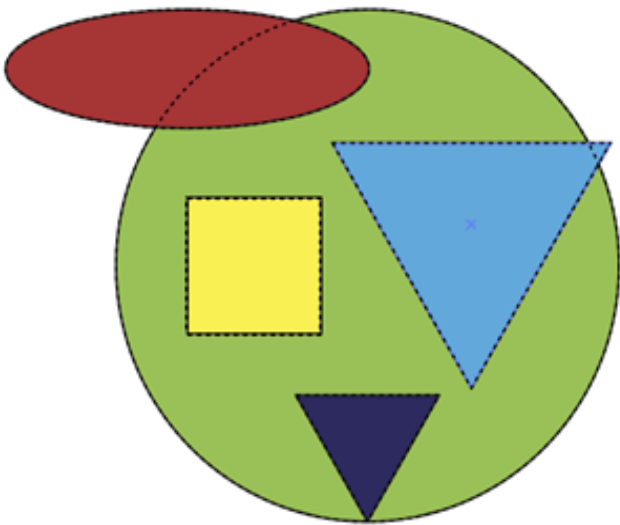

Dit:

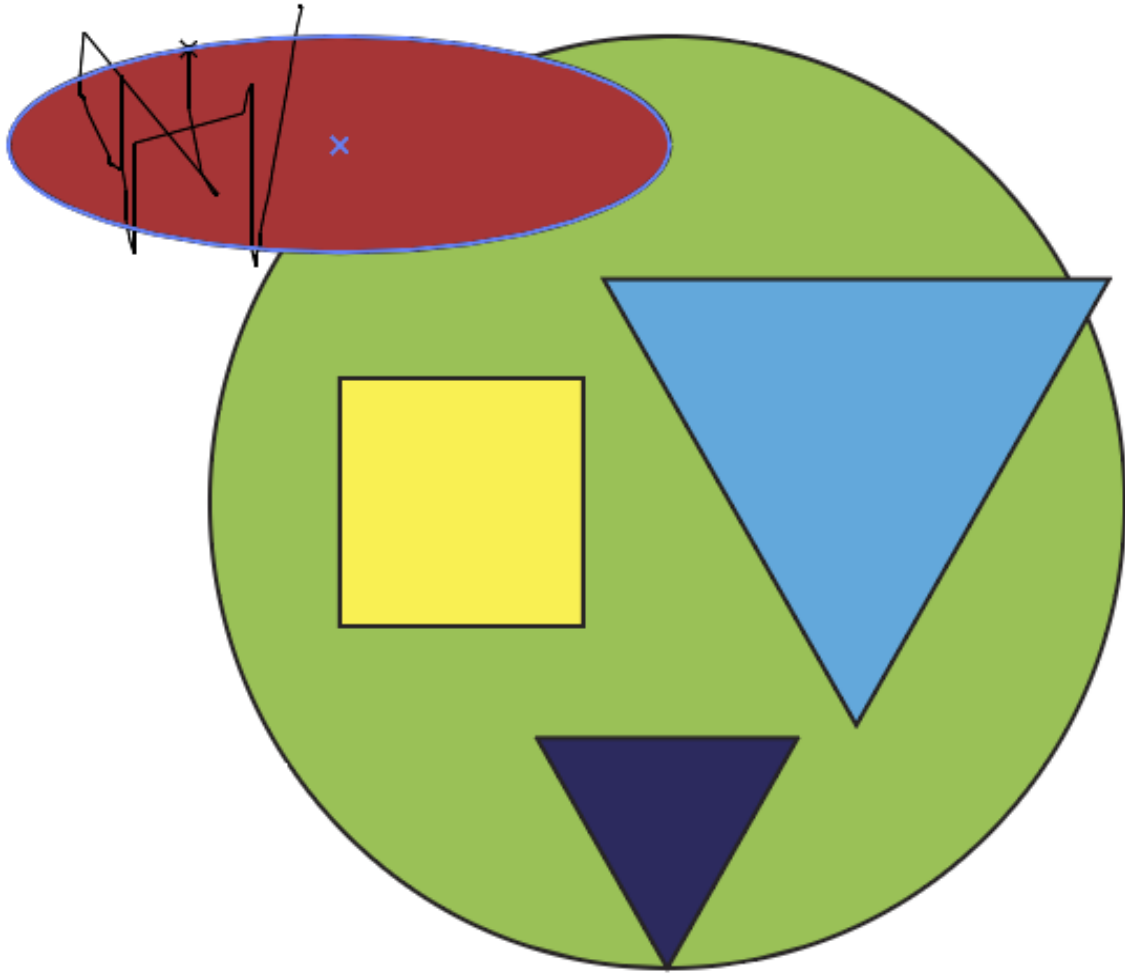

Wordt:

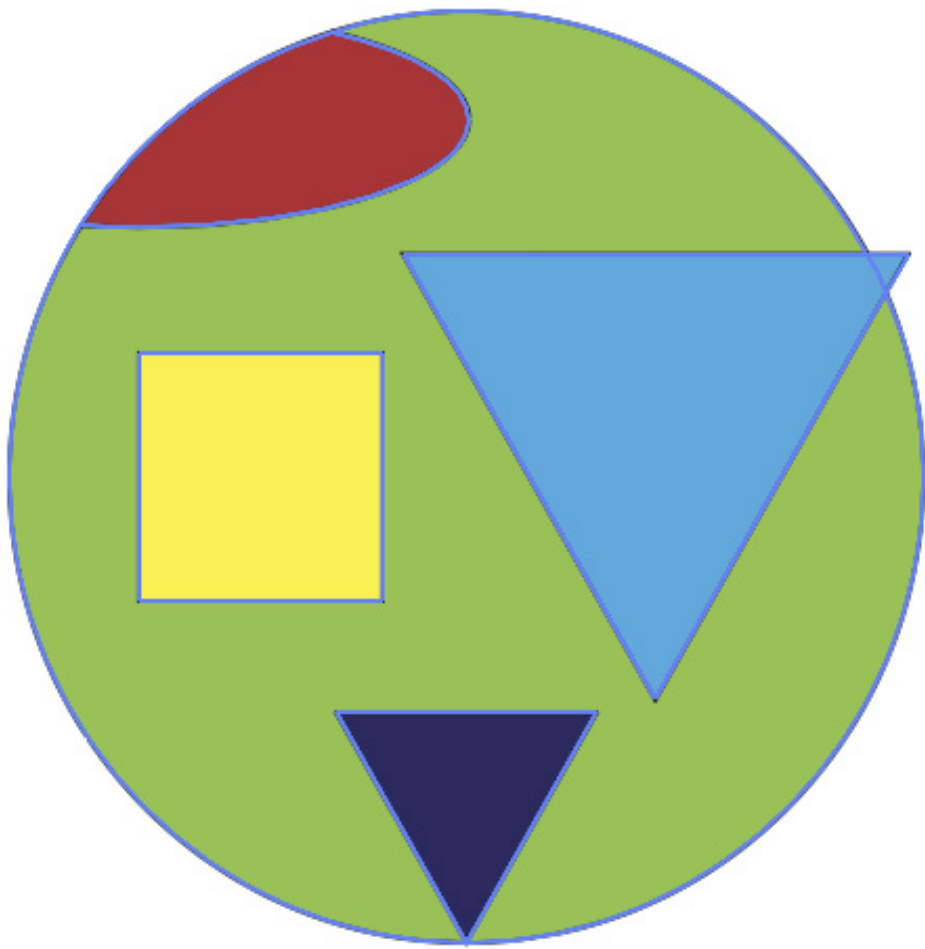

Over overlappende vormen gaan toont een stippenlijn

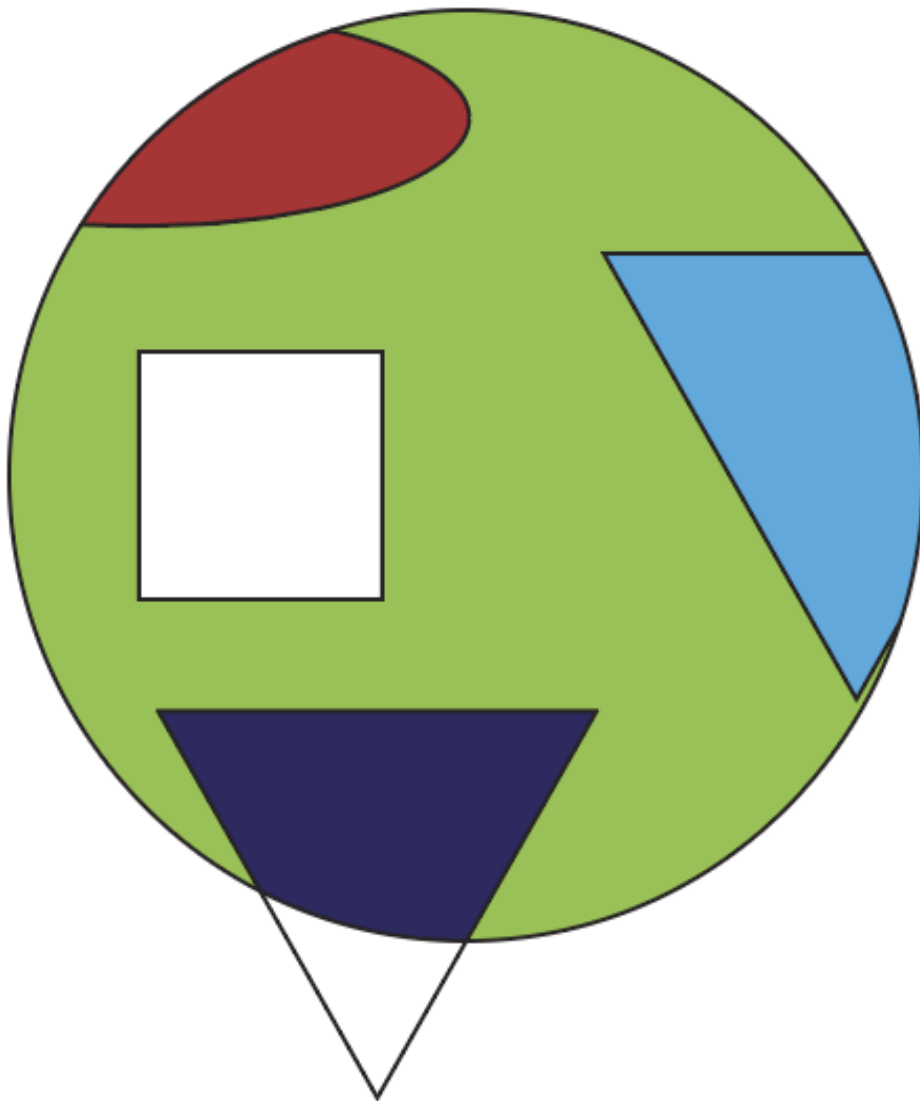

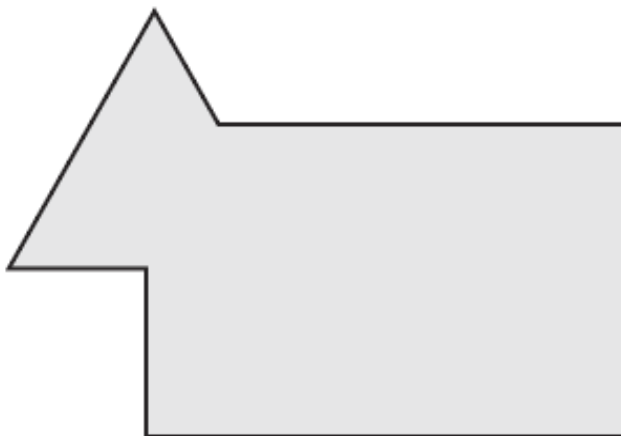

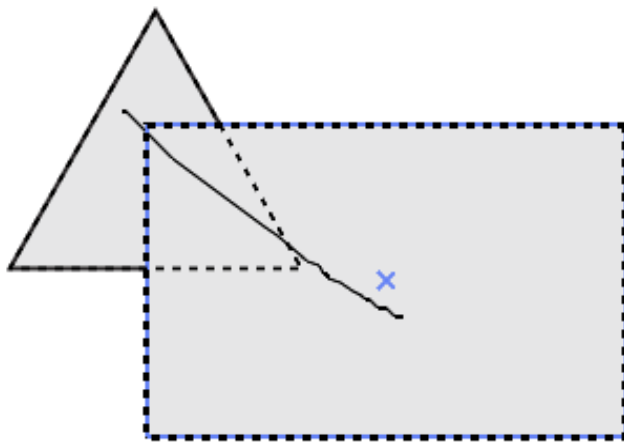

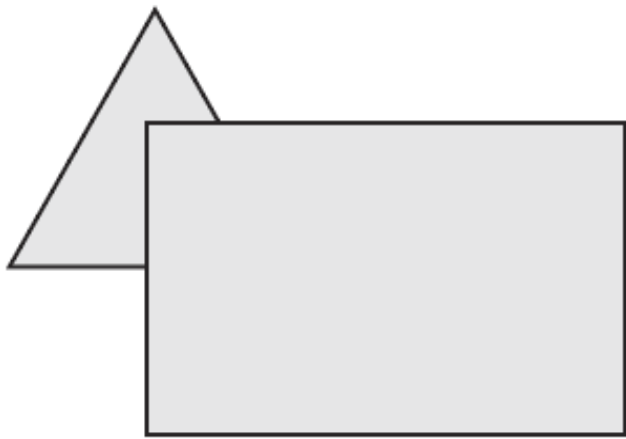

- Over krabellen

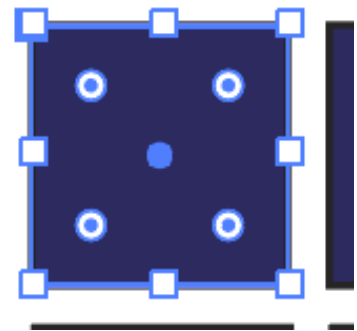

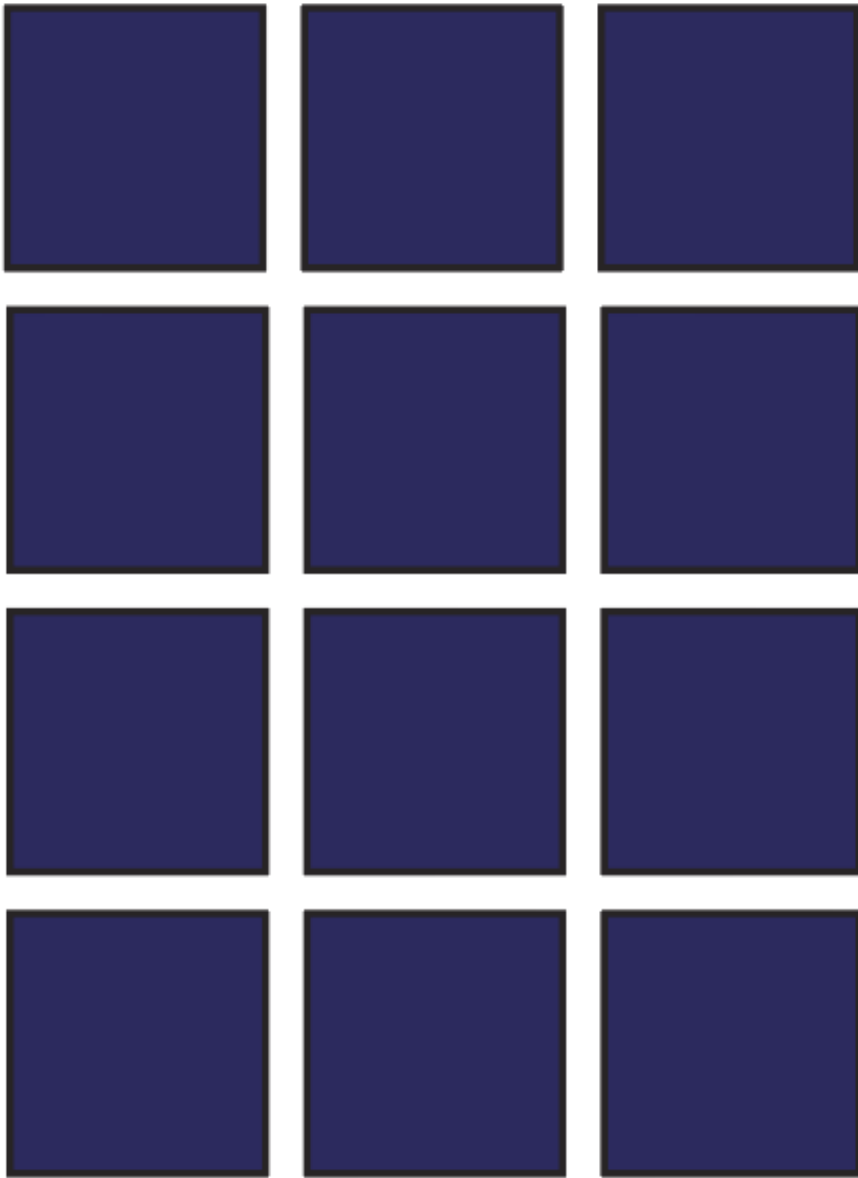

- Pathfinder acties

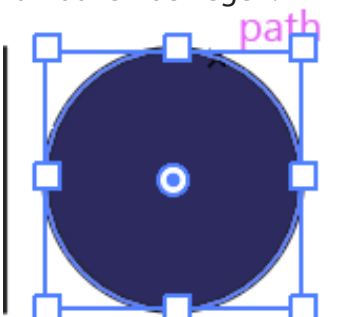

2 vormen 1 vorm maken:

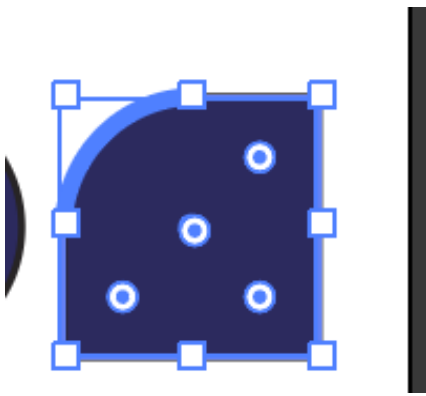

Geometrische figuur:

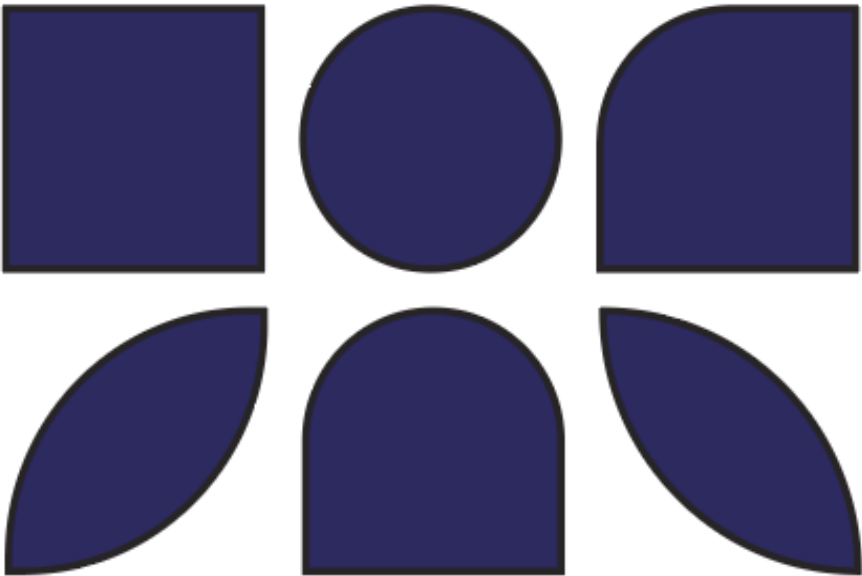

Aan bollen bewegen:

Shift + aan bollen bewegen:

Shift (meerdere selecteren en aan bollen bewegen):

Uitlijnen:
Window > Transform

Hoektypes bepalen en controleren

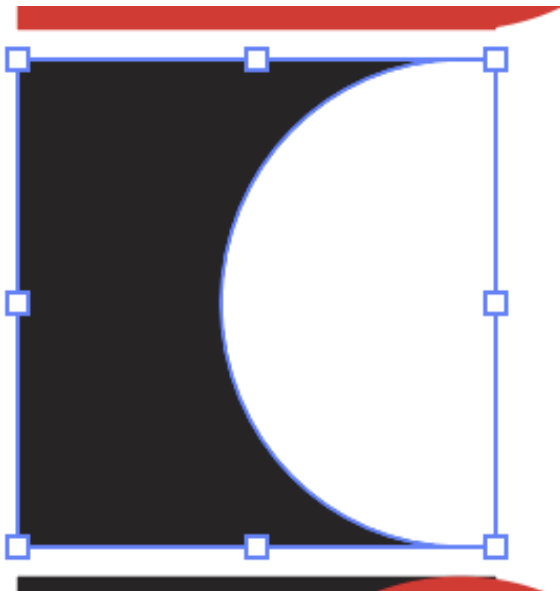

- Verschillende vormen met andere hoeksoorten en groottes

Pathfinder
Unite

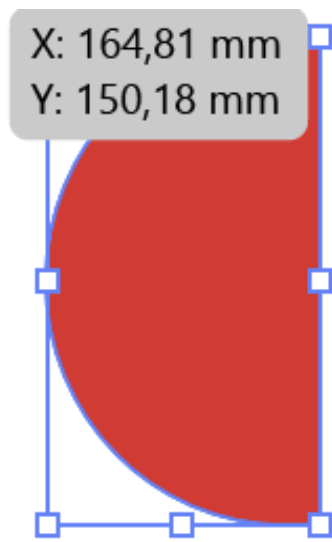

- 2 Vormen 1 vormen van maken

Minus

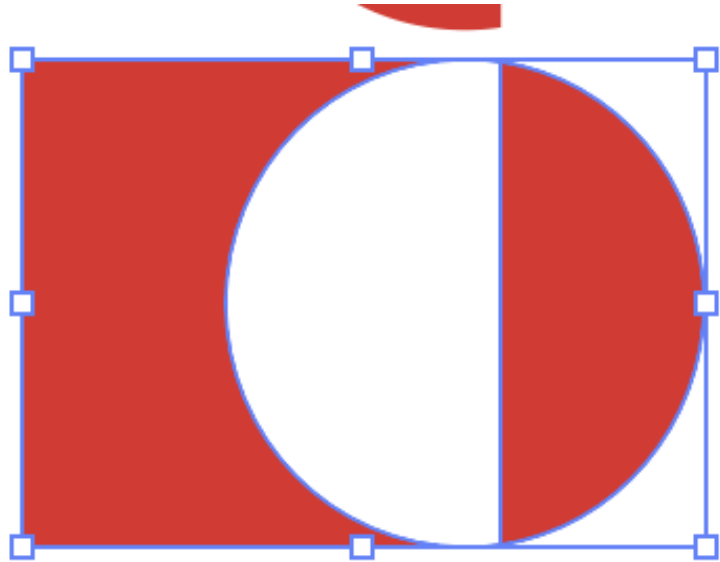

- Bovenste vorm wordt afgetrokken van de onderliggende

Intersect

- Houdt alleen de doorsnede

Exclude

- Verwijdert de doorsnede van de onderliggende vorm

Divide

van de vorm

- Maakt een soort puzzlestukken

Trim

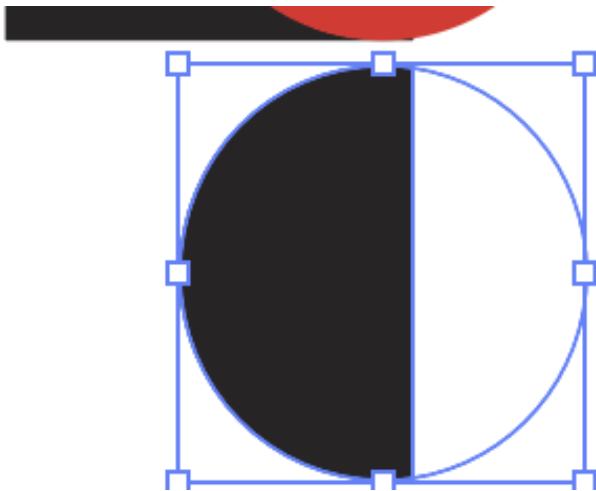

Snijdt de zichtbare delen van elkaar af

Merge

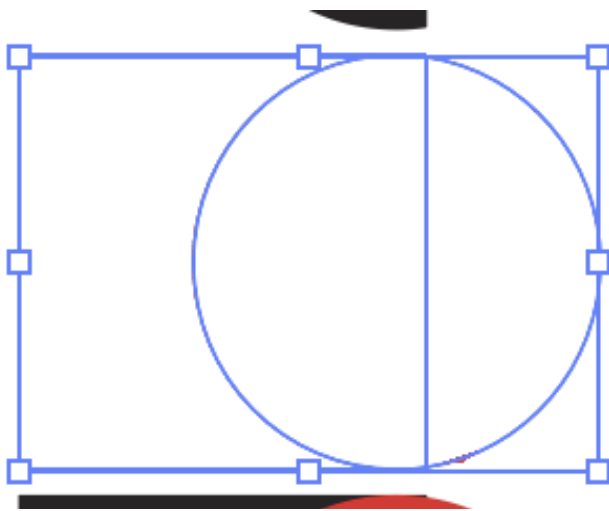

- Vorm samenvoegen

Crop

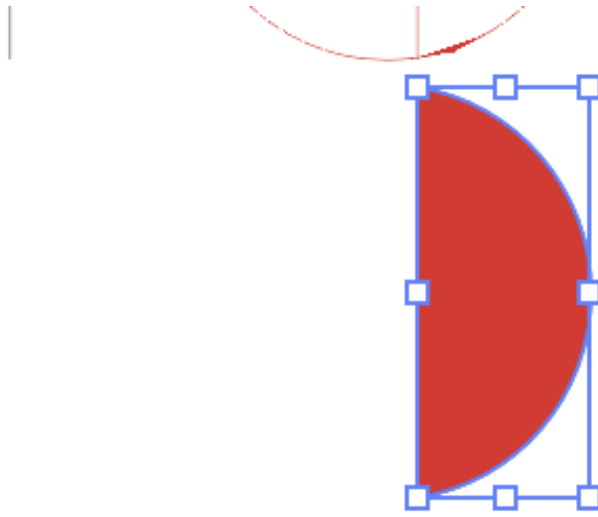

Snijdt de bovenste vorm als masker uit de onderste

Outline

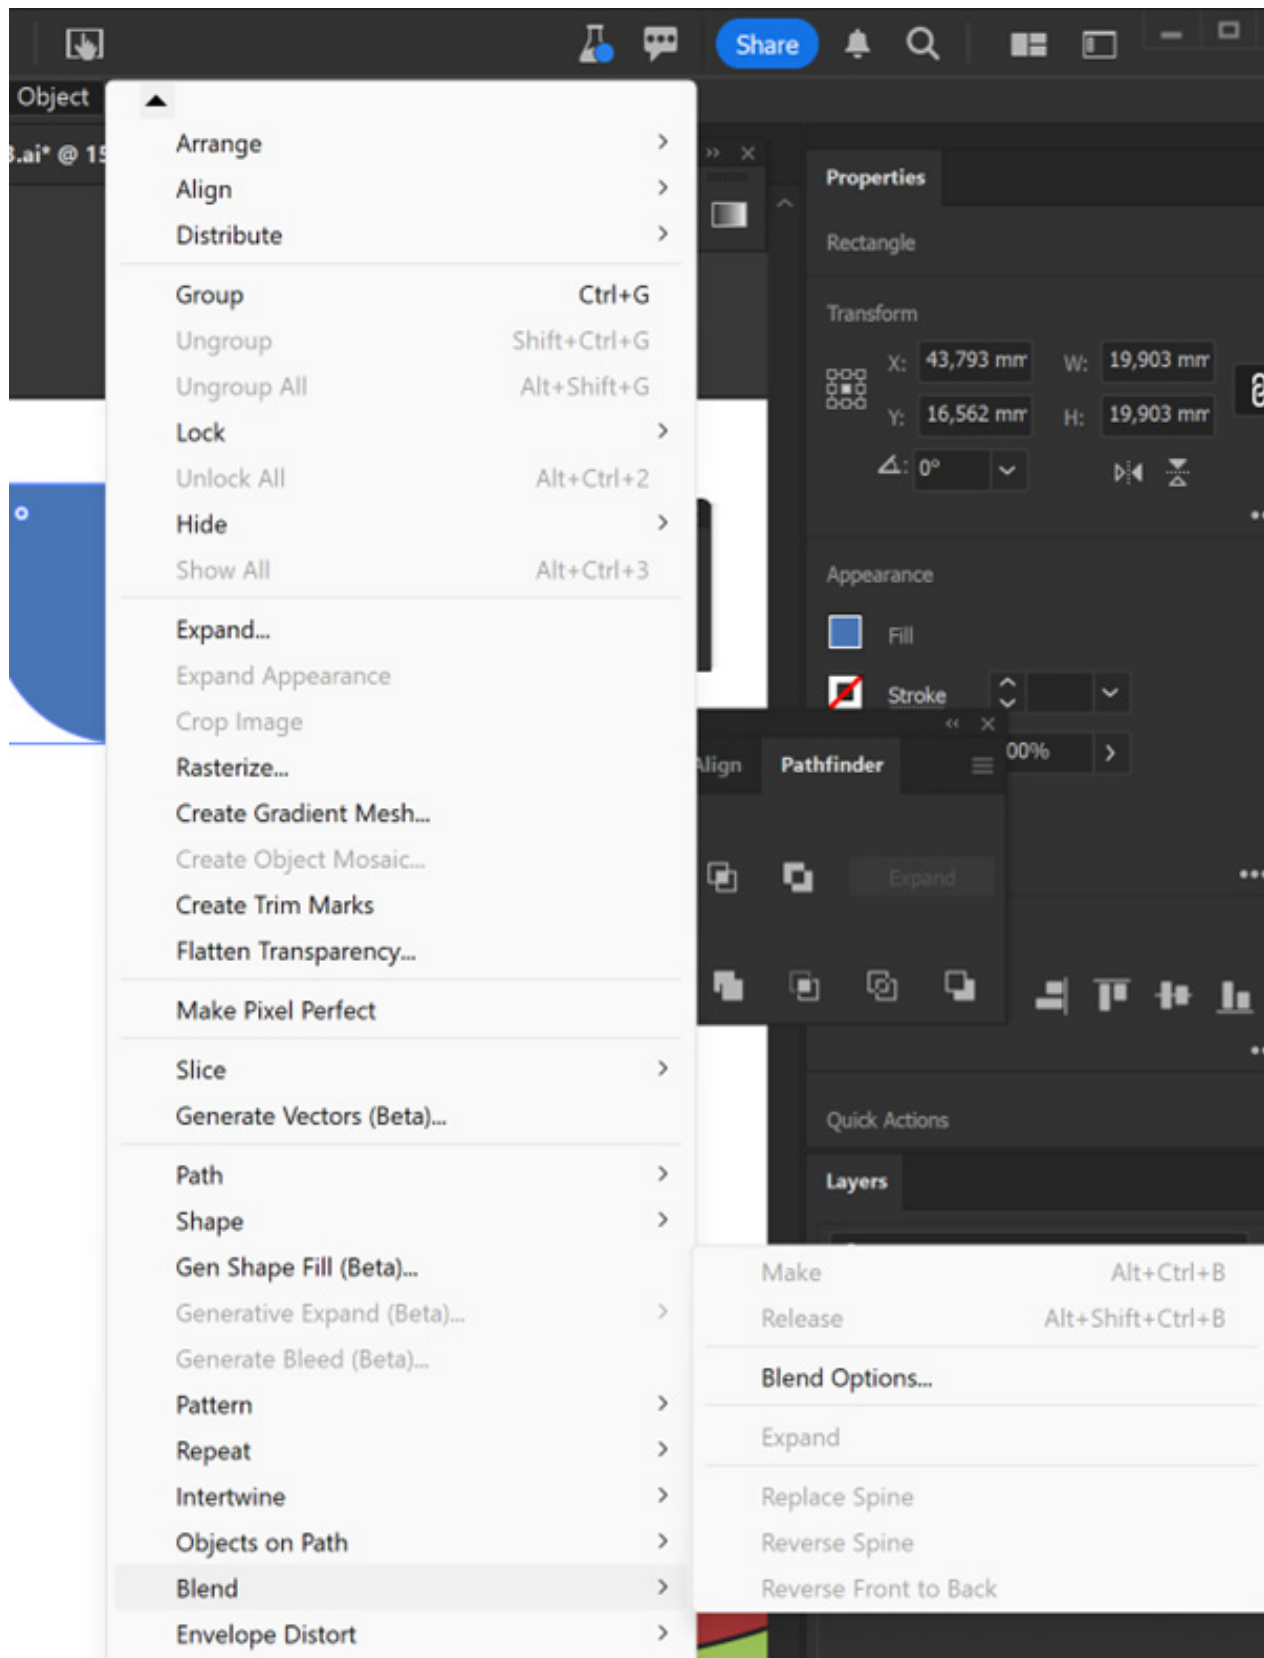

Behoudt enkel de outline van de vormen

Minus back

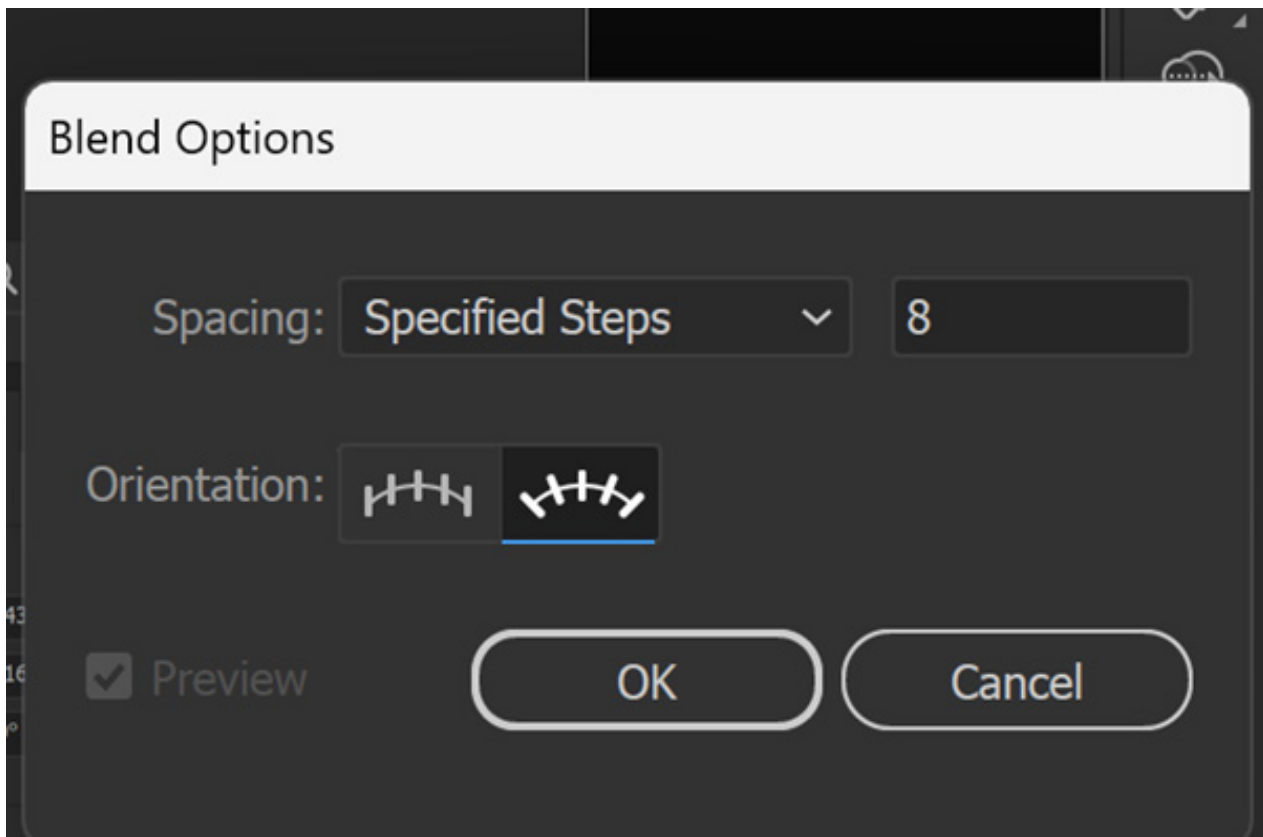

- Snijdt de onderste vorm weg uit alles

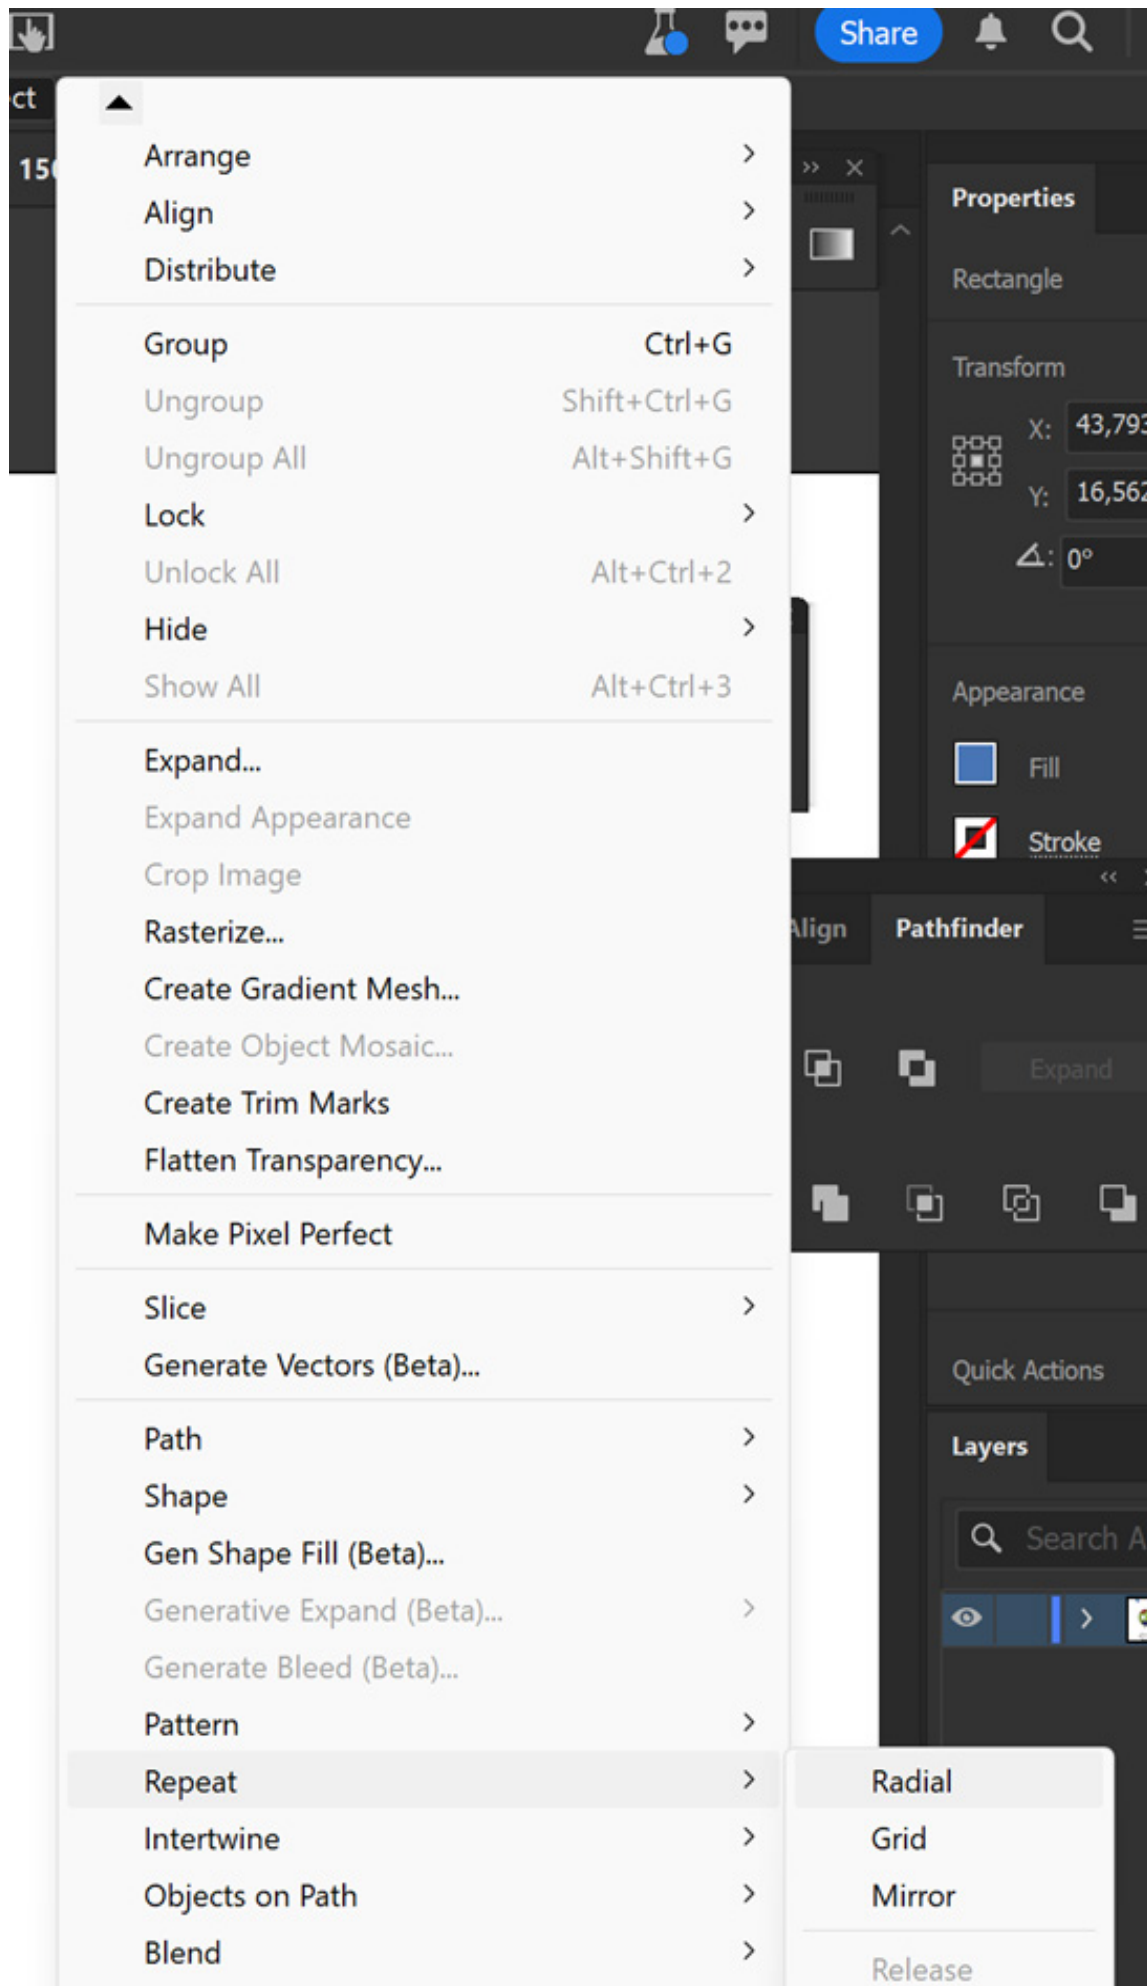

Blend options

Object > blend > blend options

Object > Repeat > Radial of options

Arrange >
Align >
Distribute >

Release

Bepaald hoeveelheid door aan te slepen

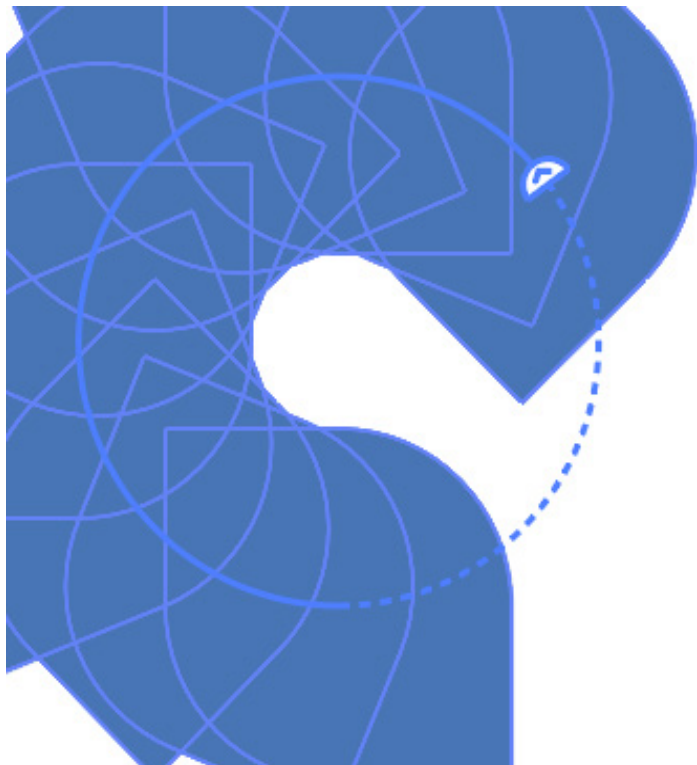

Shape Modes:

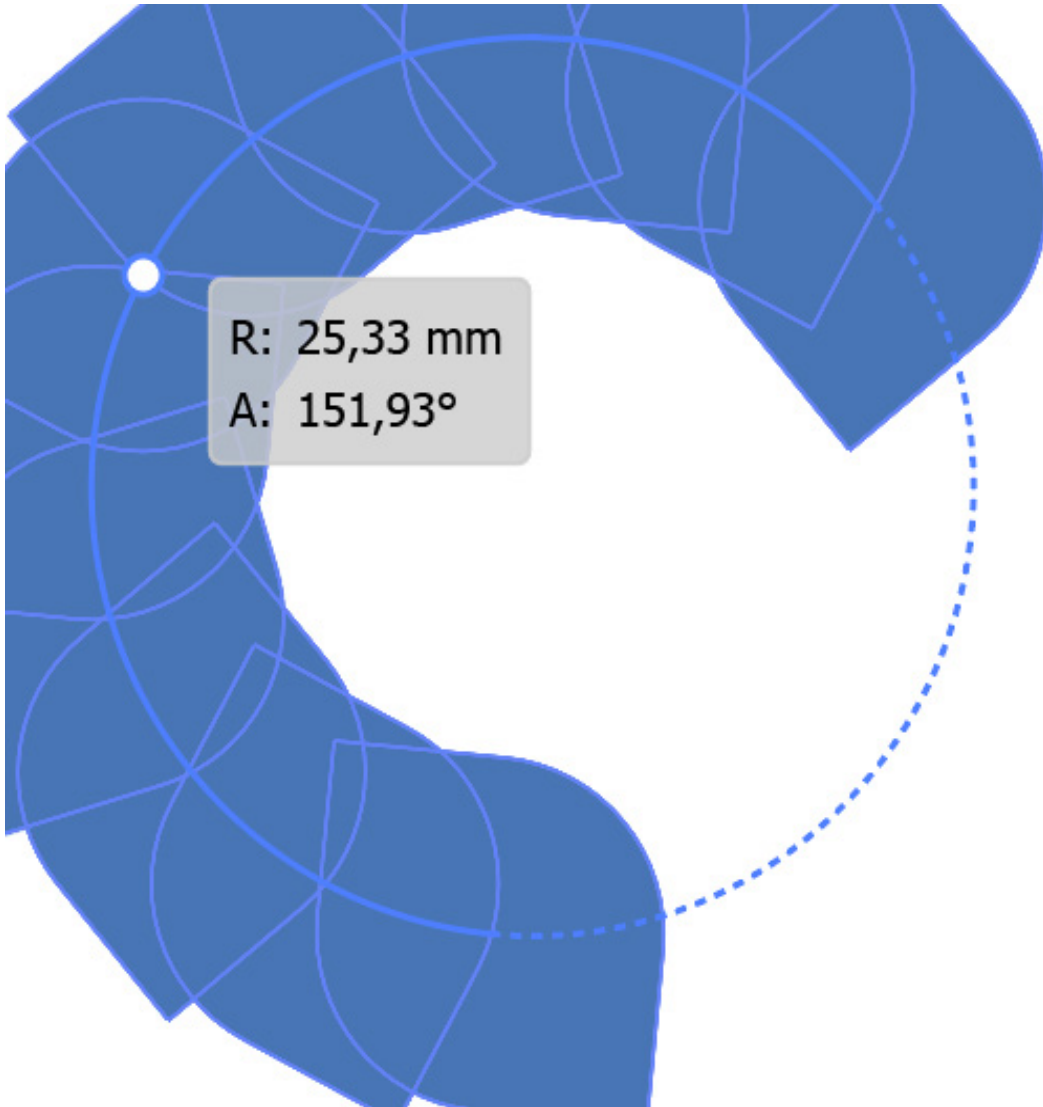

Pathfinders:

Instances: 6

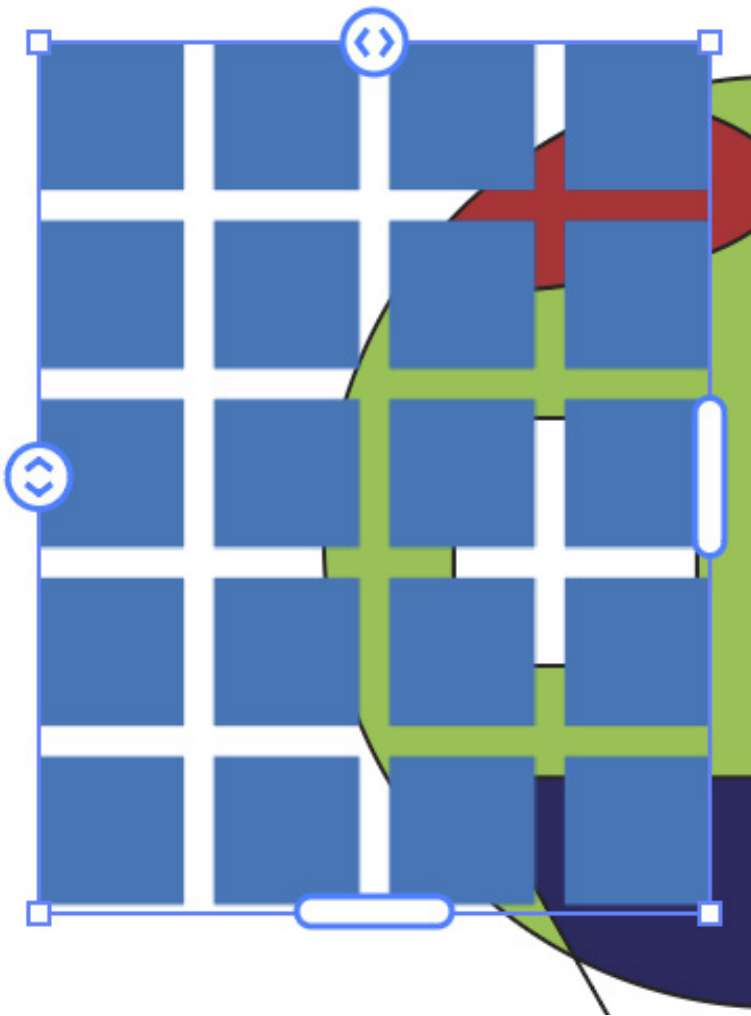

- Bepaalt start en eind positie

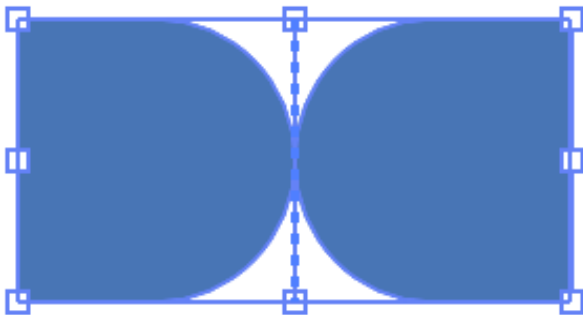

R: 25,33 mm
A: 151,93°

- Bepaalt radius

Object > Repeat > Grid

- Slepen om afstand te vergroten

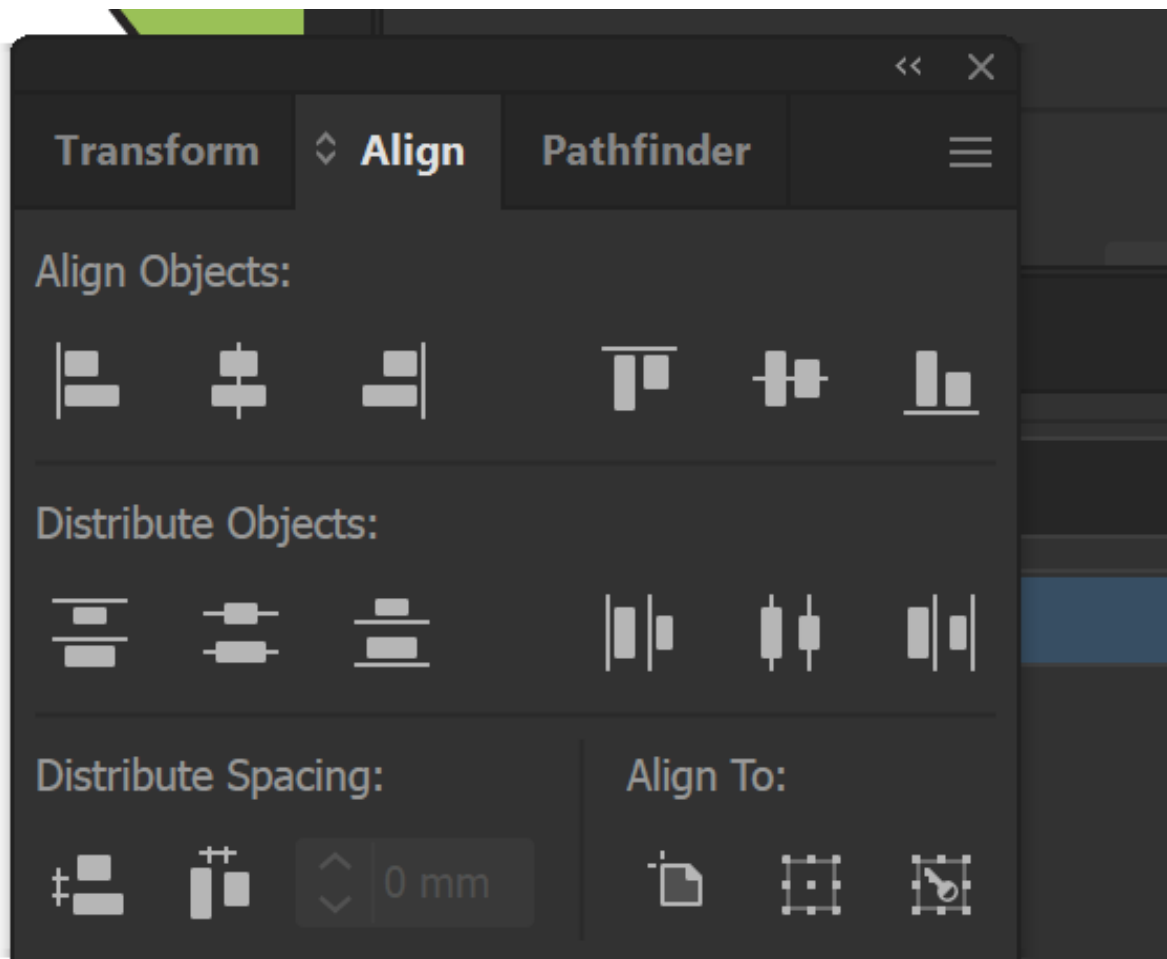

- Object > Repeat > Mirror

Align/uitlijning

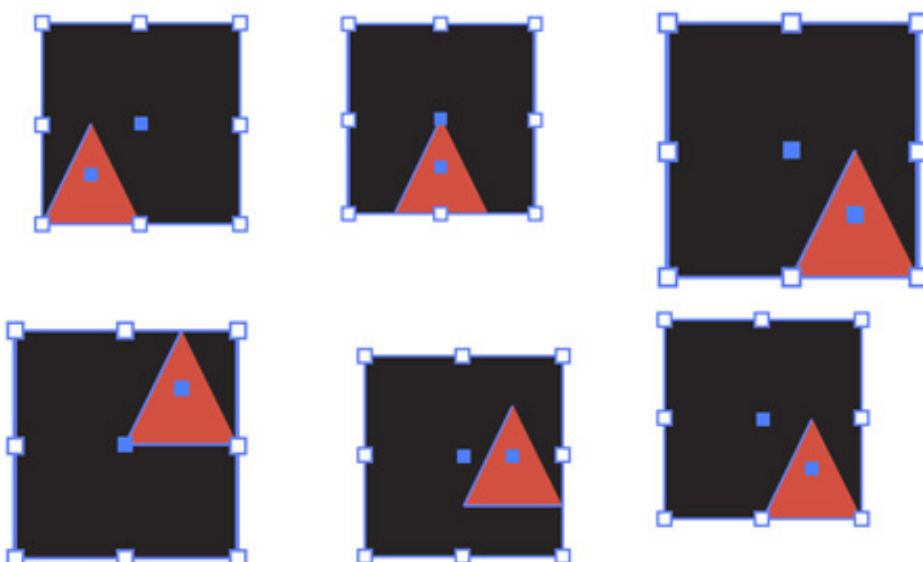

Window > Align

- Belangrijk om precies en nauwkeurig vormen uit te lijnen

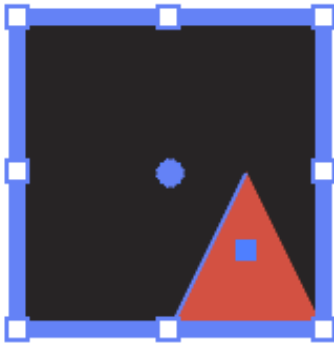

Vorm uitlijnen op document (links, midden, rechts, top, midden, onder)

- 2 vormen aanklikken, zal hij uitlijnen tegenover de twee vormen, uitlijnen relatief aan vormen, niet aan pagina

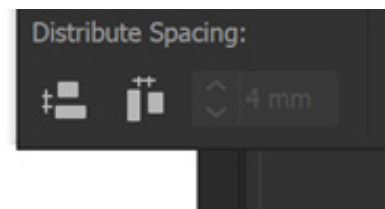

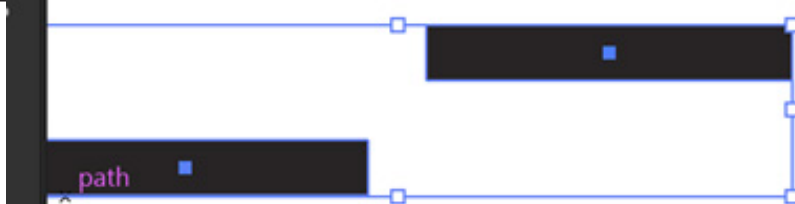

Vorm laten staan en uitlijnen

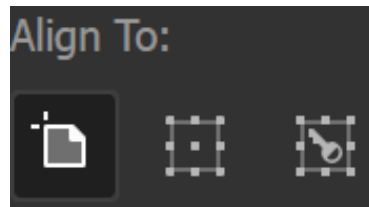

- Selecteer beide vormen
- Klik op de vorm die moet blijven staan
- Uitlijnen

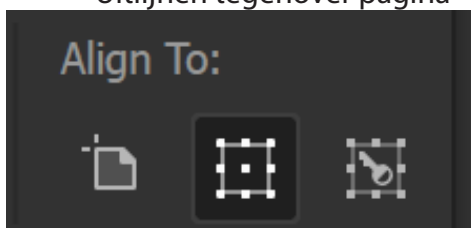

Tussenruimte bepalen

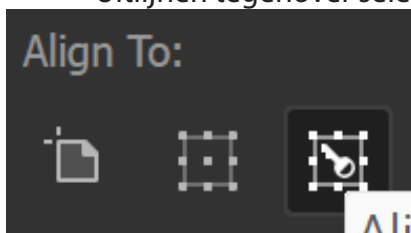

- Horizontaal of verticaal tussenruimte bepalen
- Eerst beide vormen selecteren
- Klikken op vorm die moet blijven staan
- Afstand en horizontaal/verticaal uitlijnen instellen

- Uitlijnen tegenover pagina

- Uitlijnen tegenover selectie

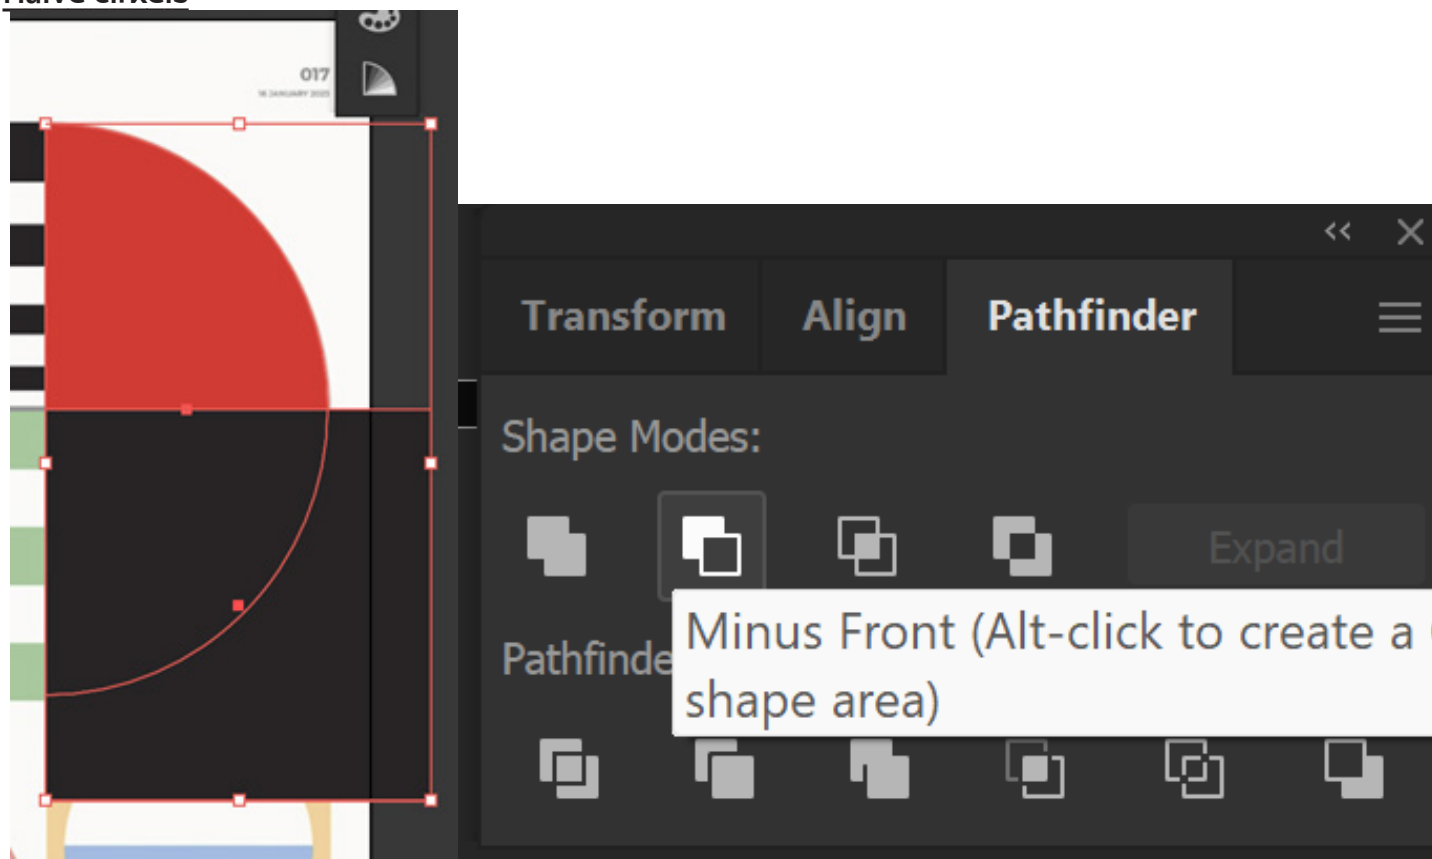

- Uitlijnen tegenover aangeklikt object

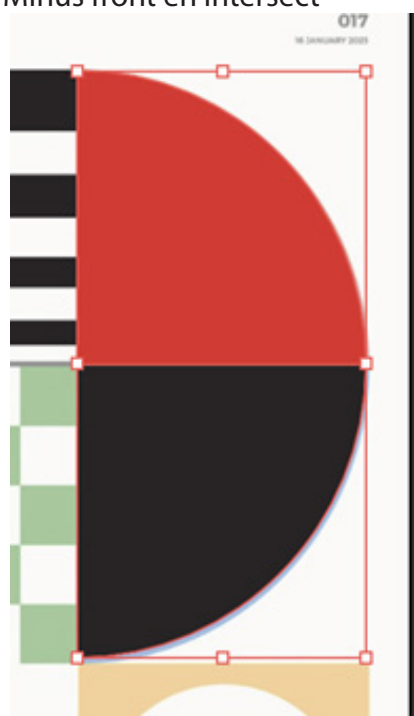

Afbeelding namaken

Align tool, blending tool, repeat tool, pathfinder

Eindresultaat

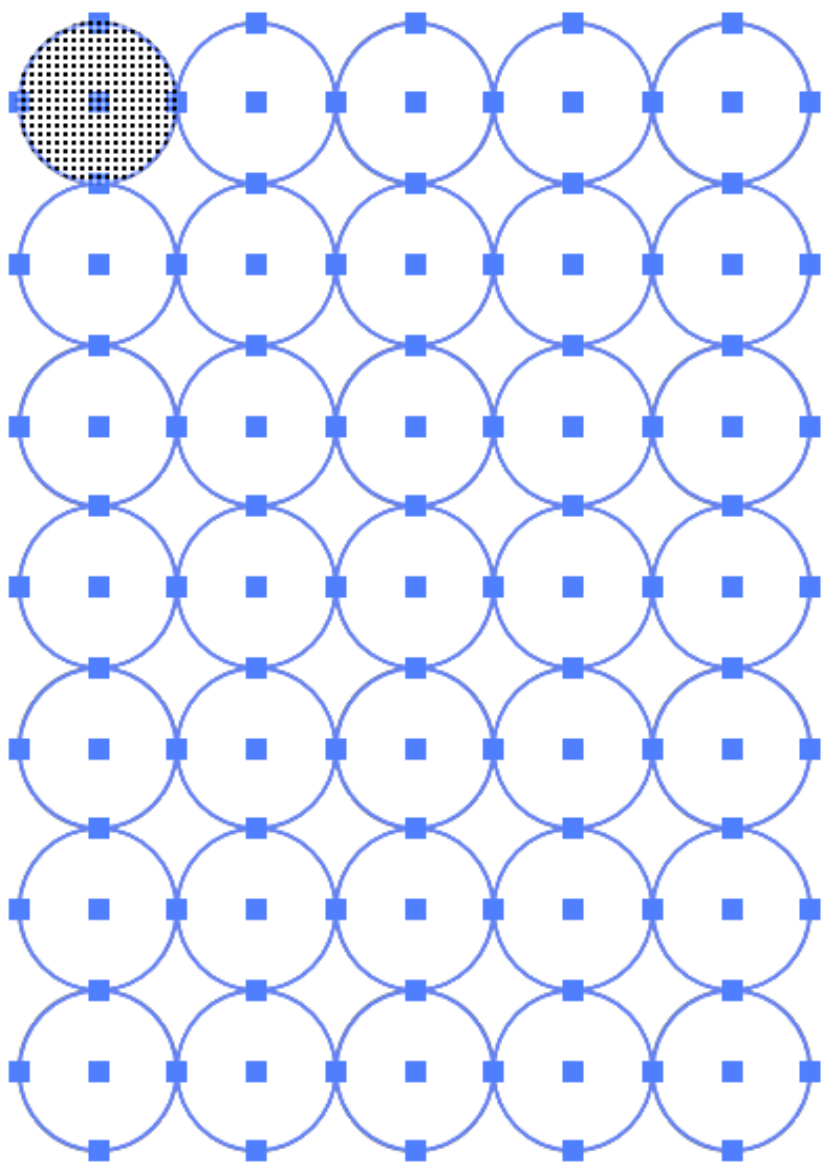

Ctrl +Y: Eindresultaat

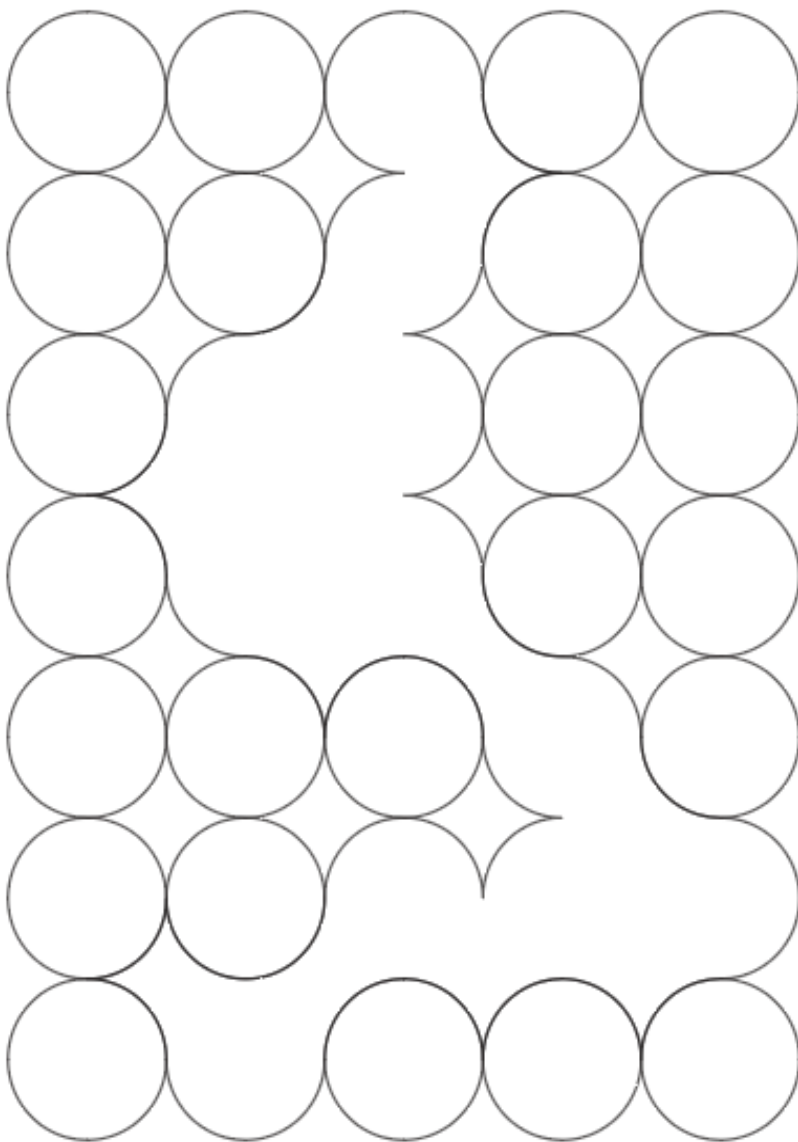

Shape builder tool

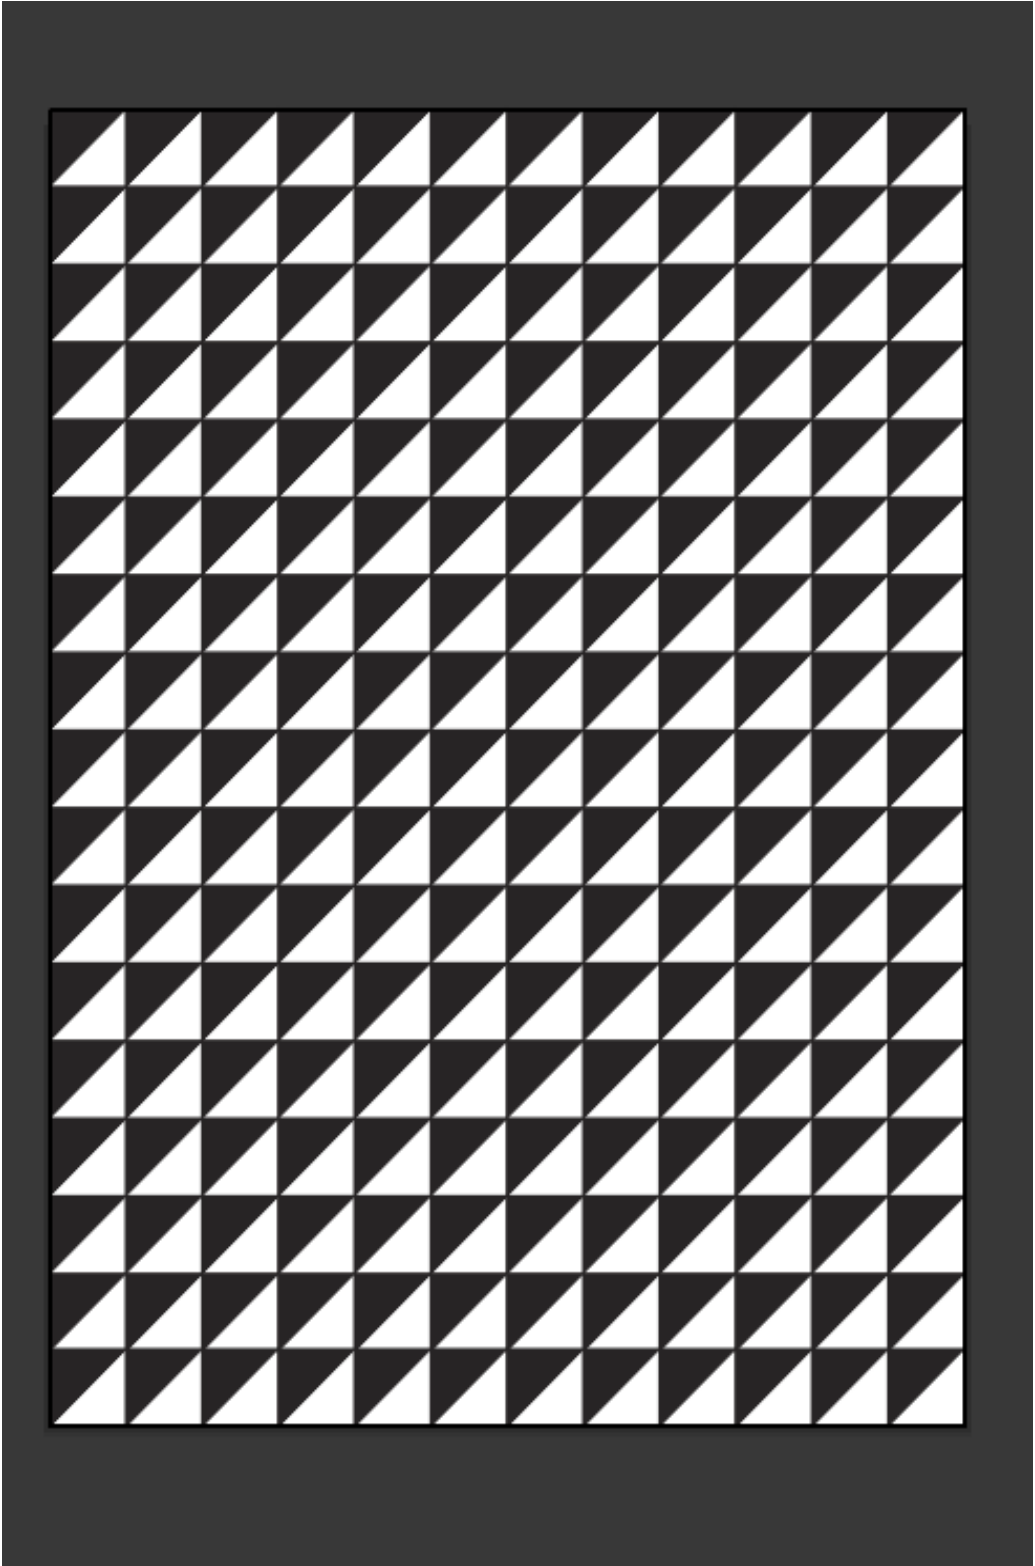

Raster van vormen

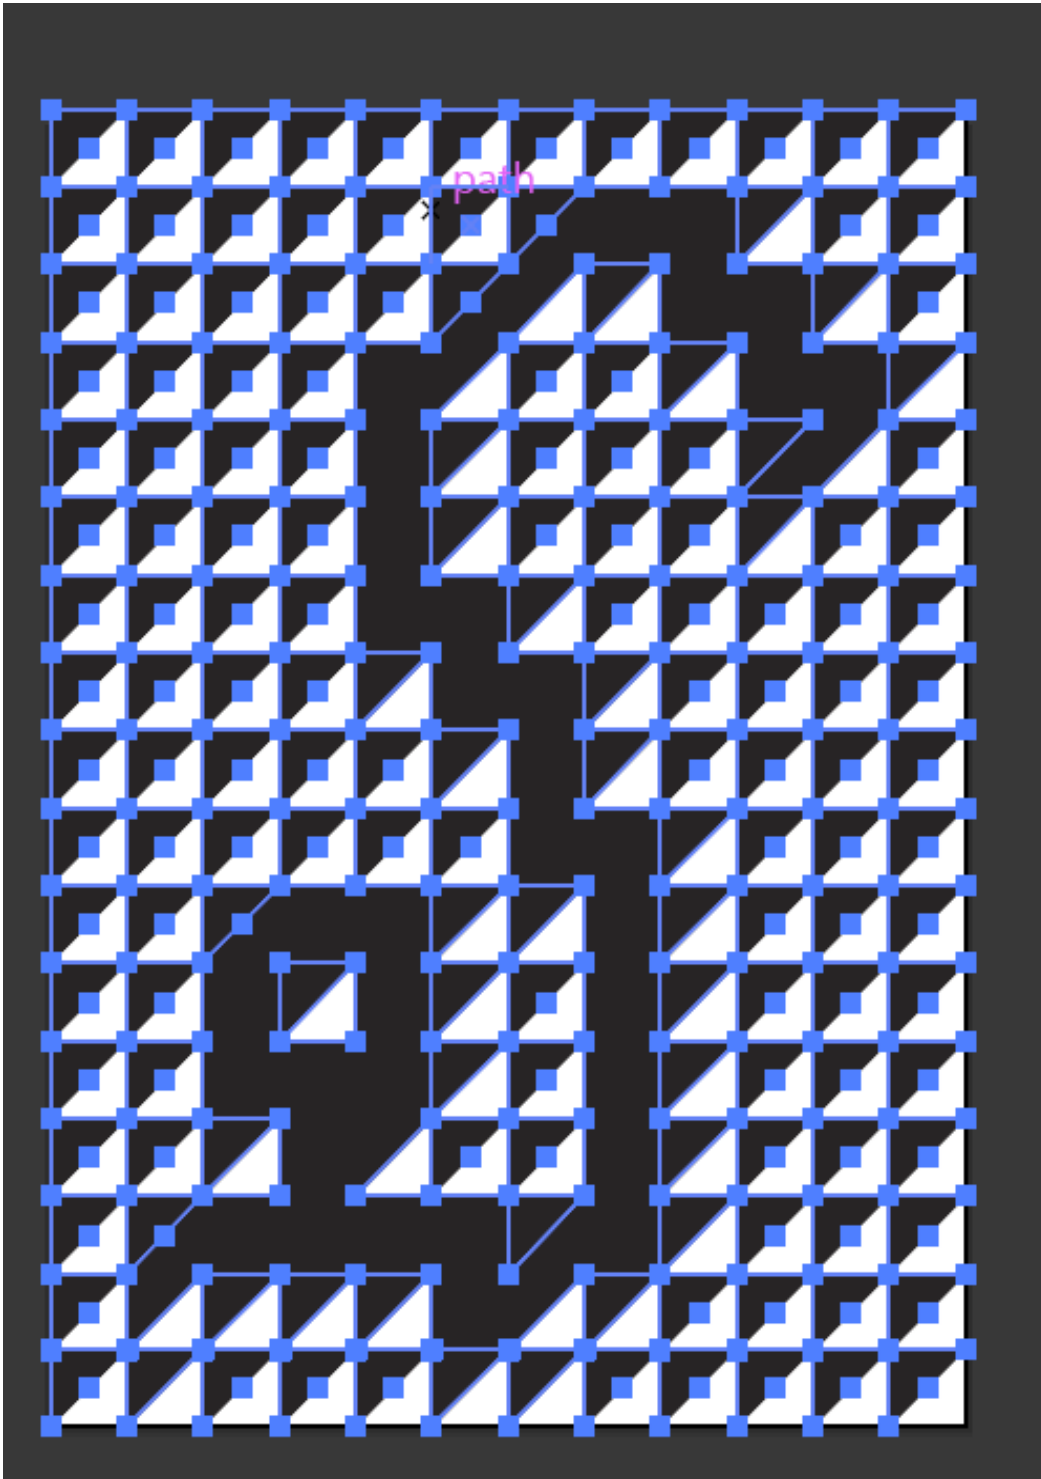

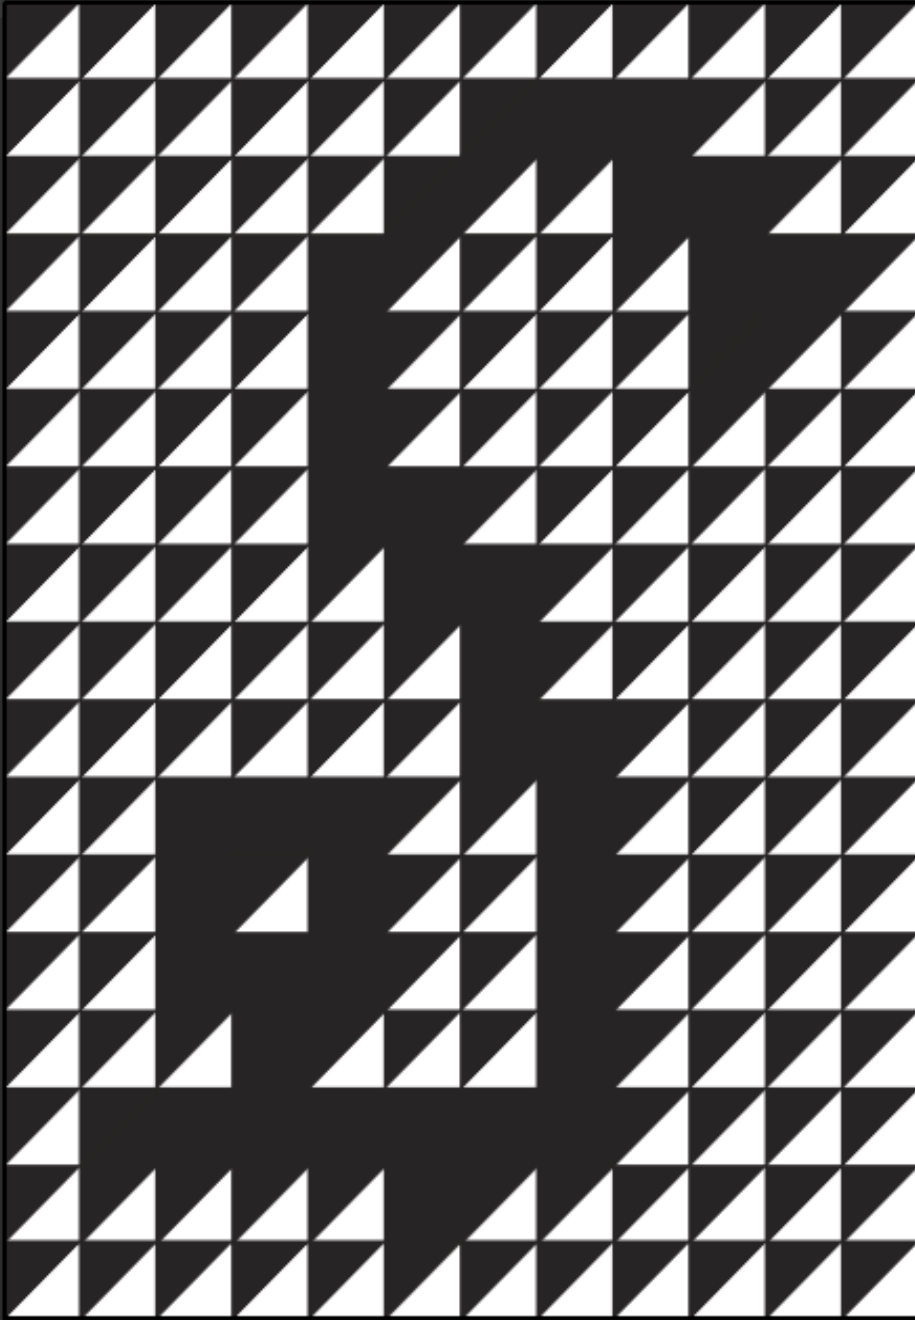

- Met muis over slepen zal vormen samenvoegen
- Ctrl/option is vormen wegdoen

Letter ontwerpen uit raster

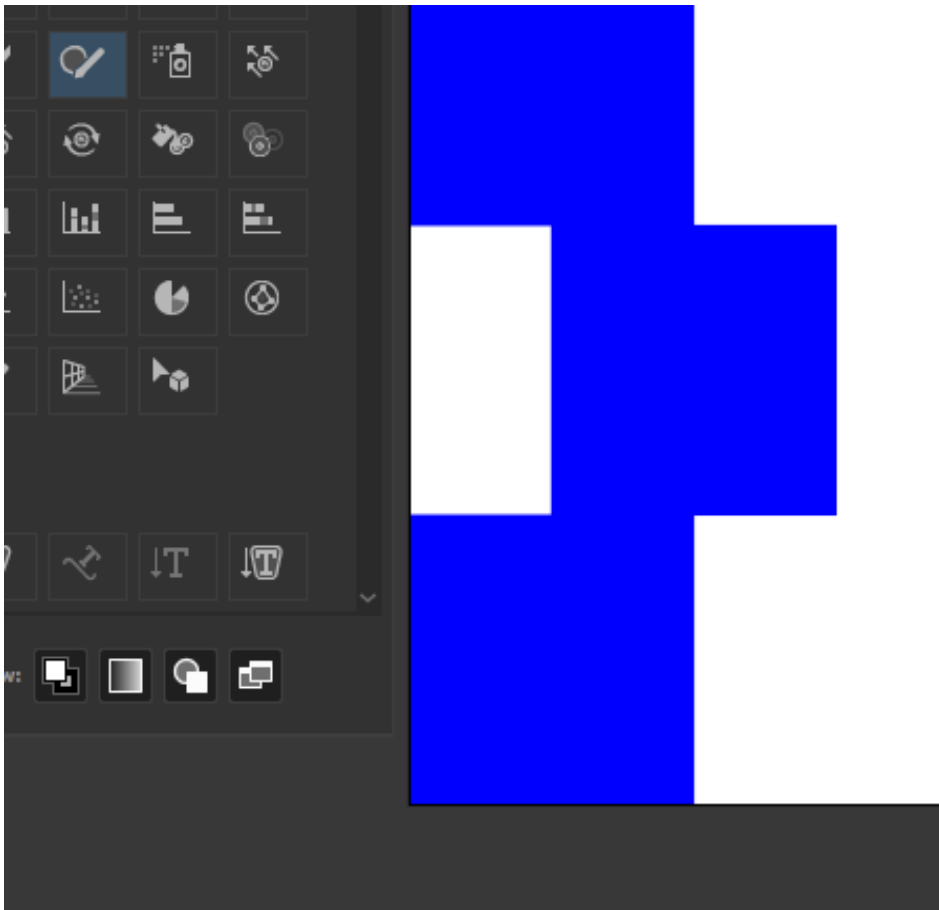

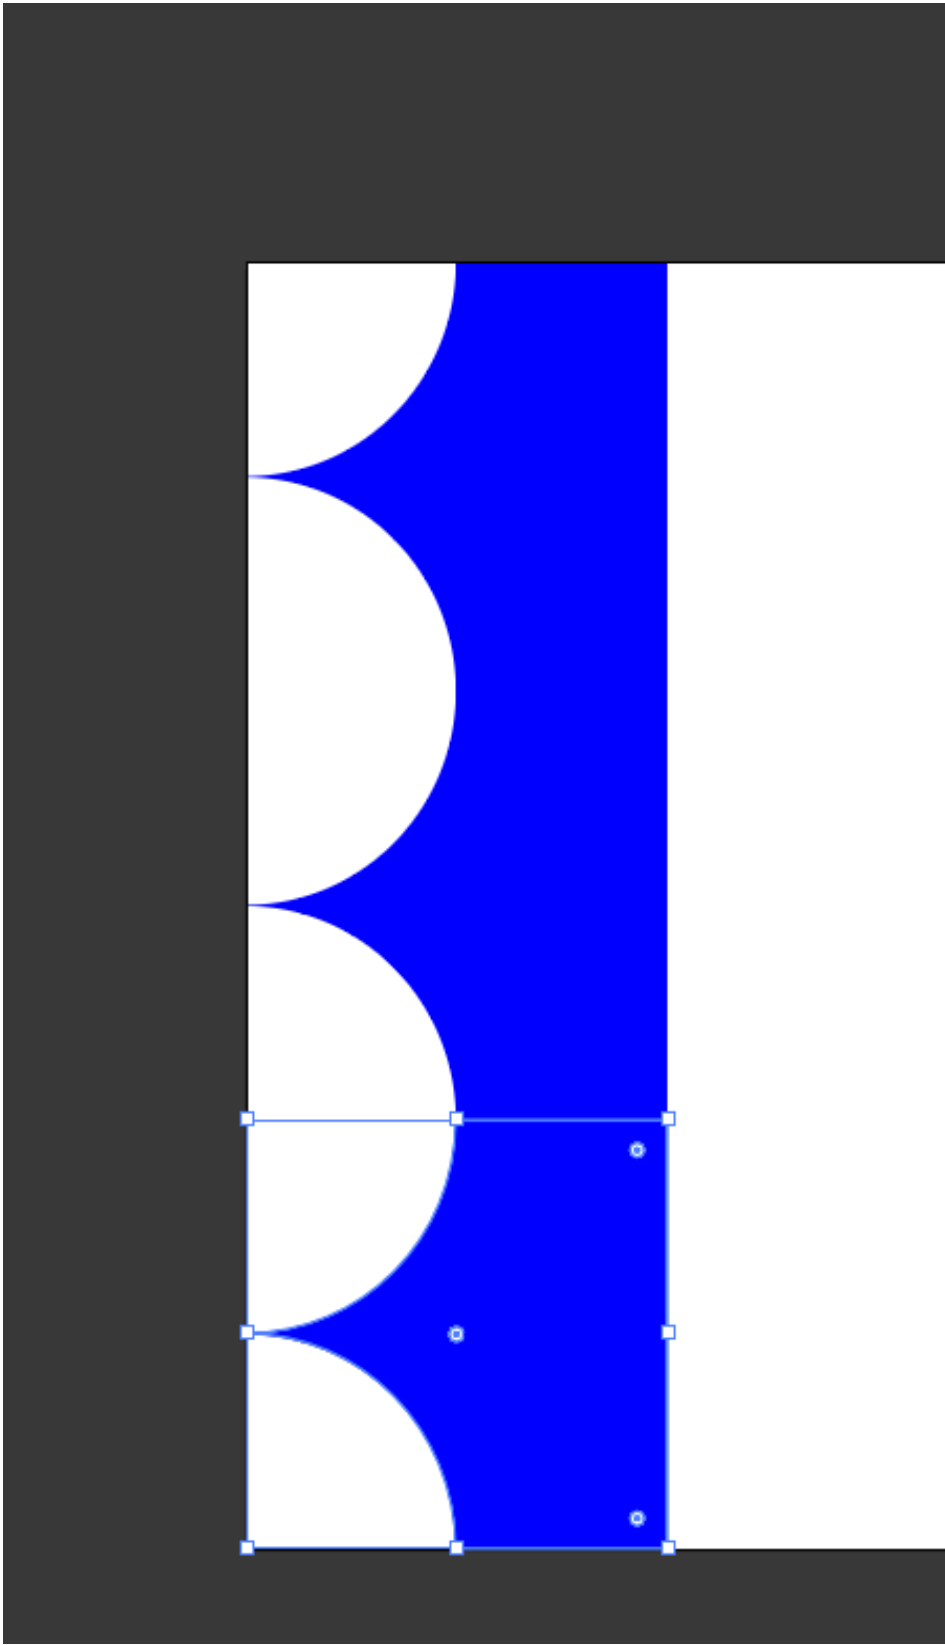

- S getekend met shape builder tool

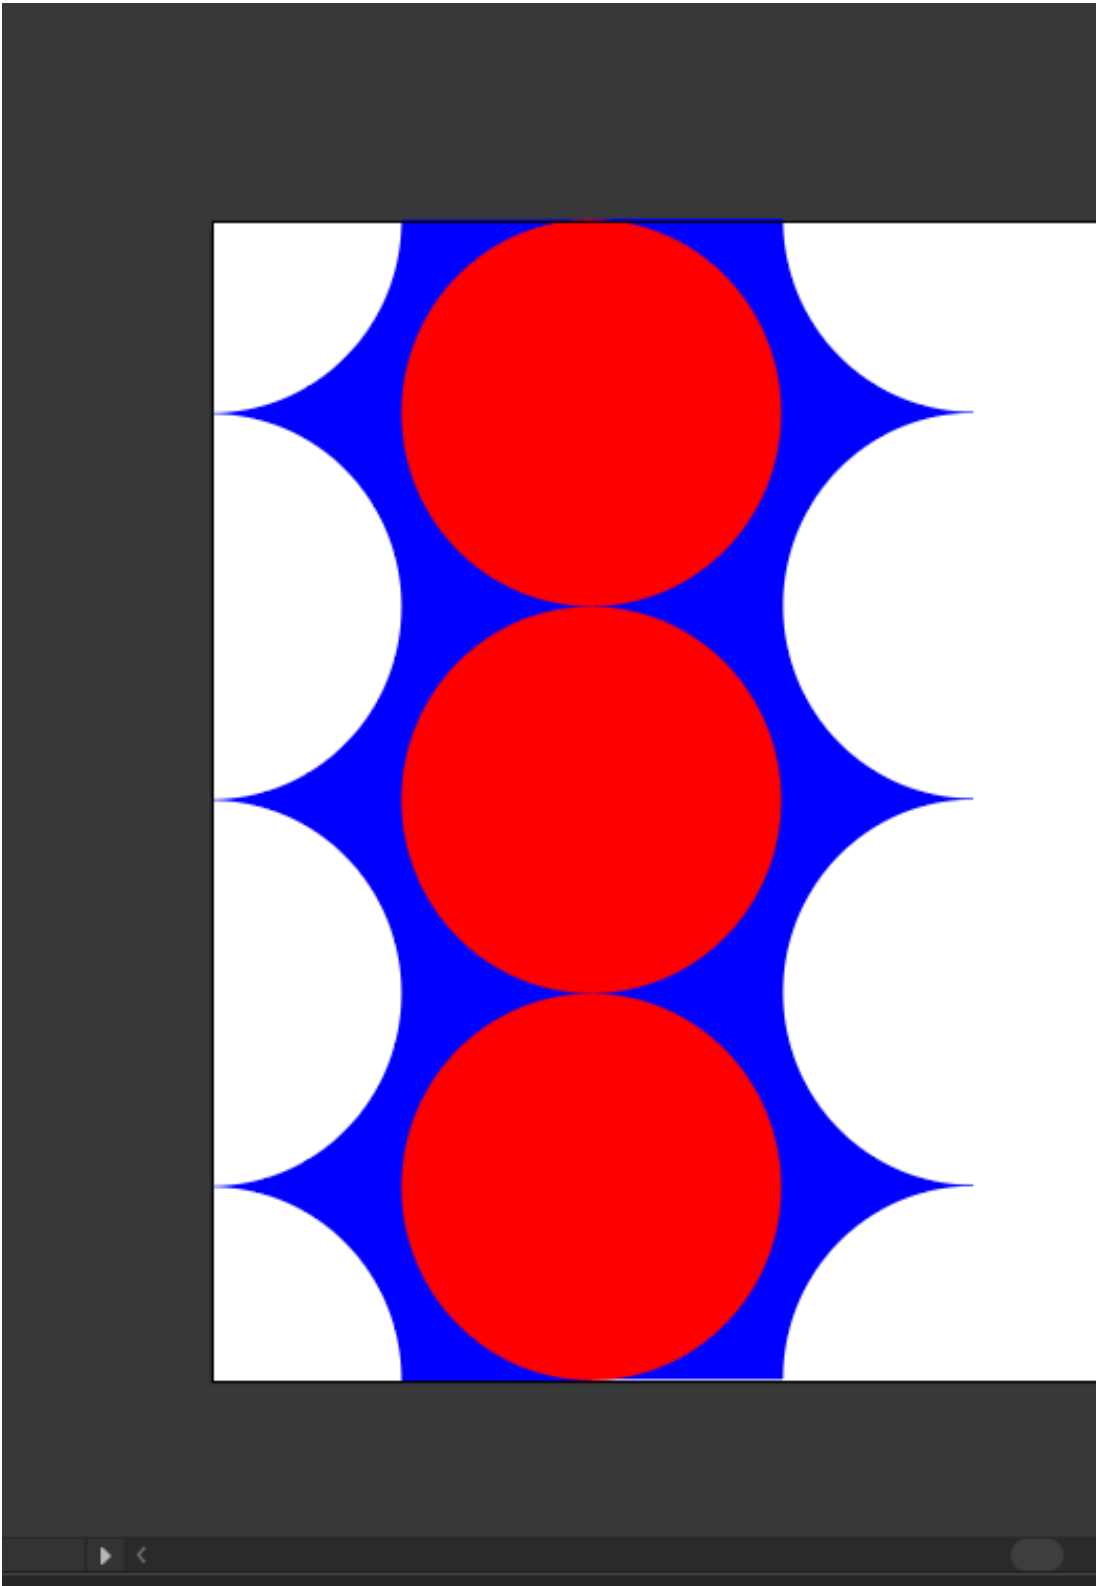

Voetbalsjaal opdracht:

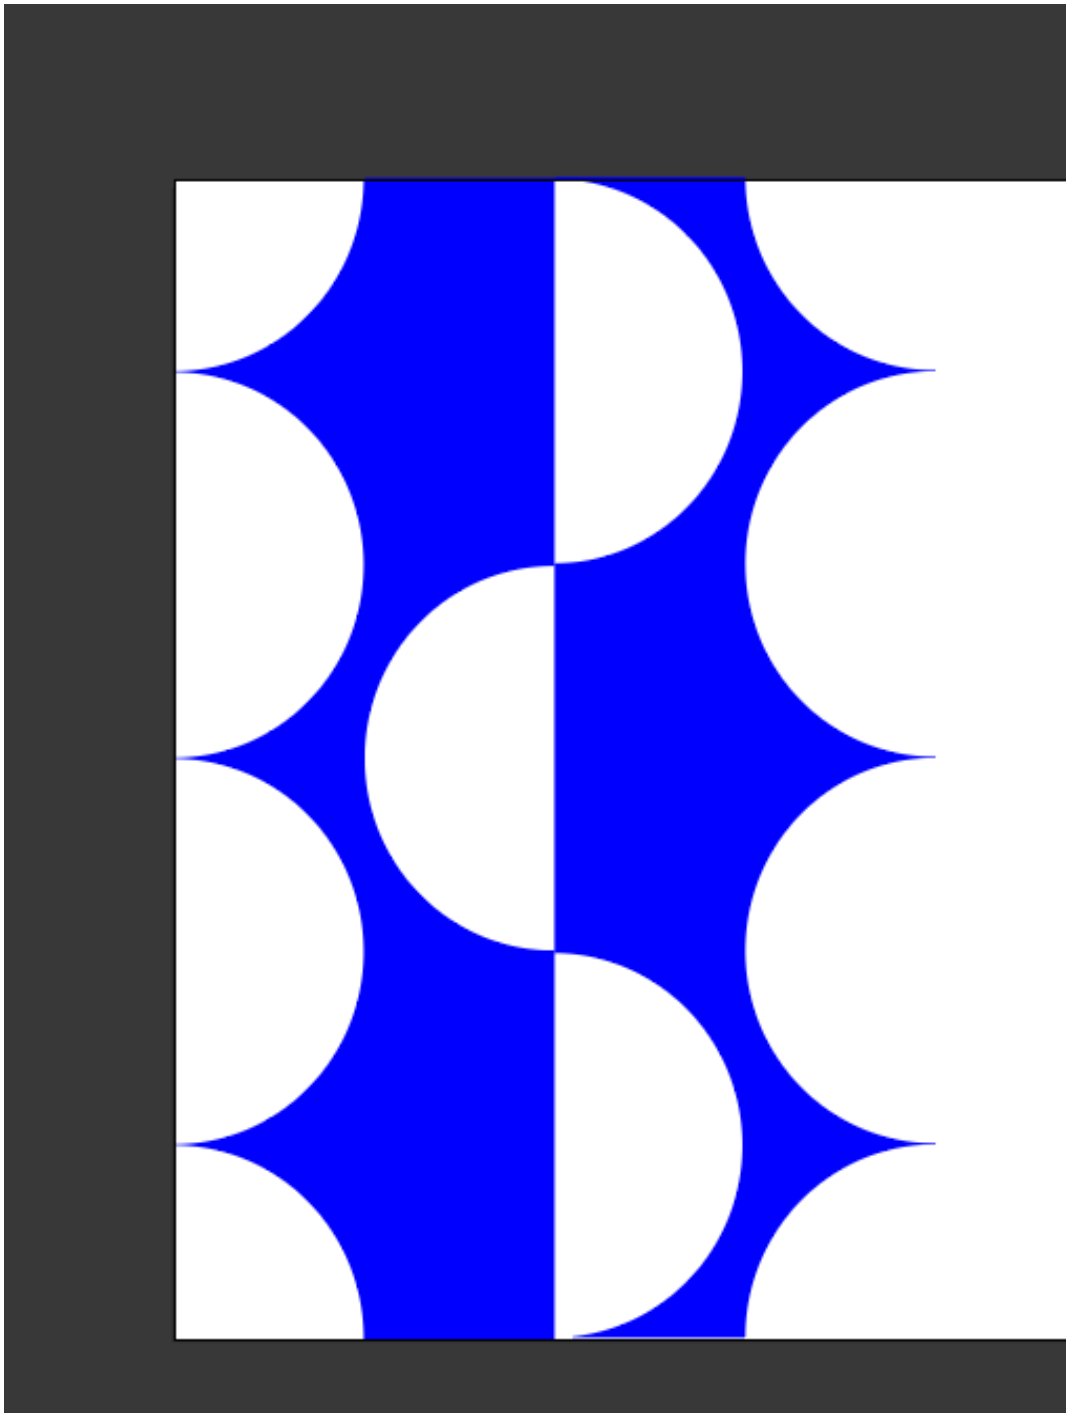

Kubussen getekend met shaper tool

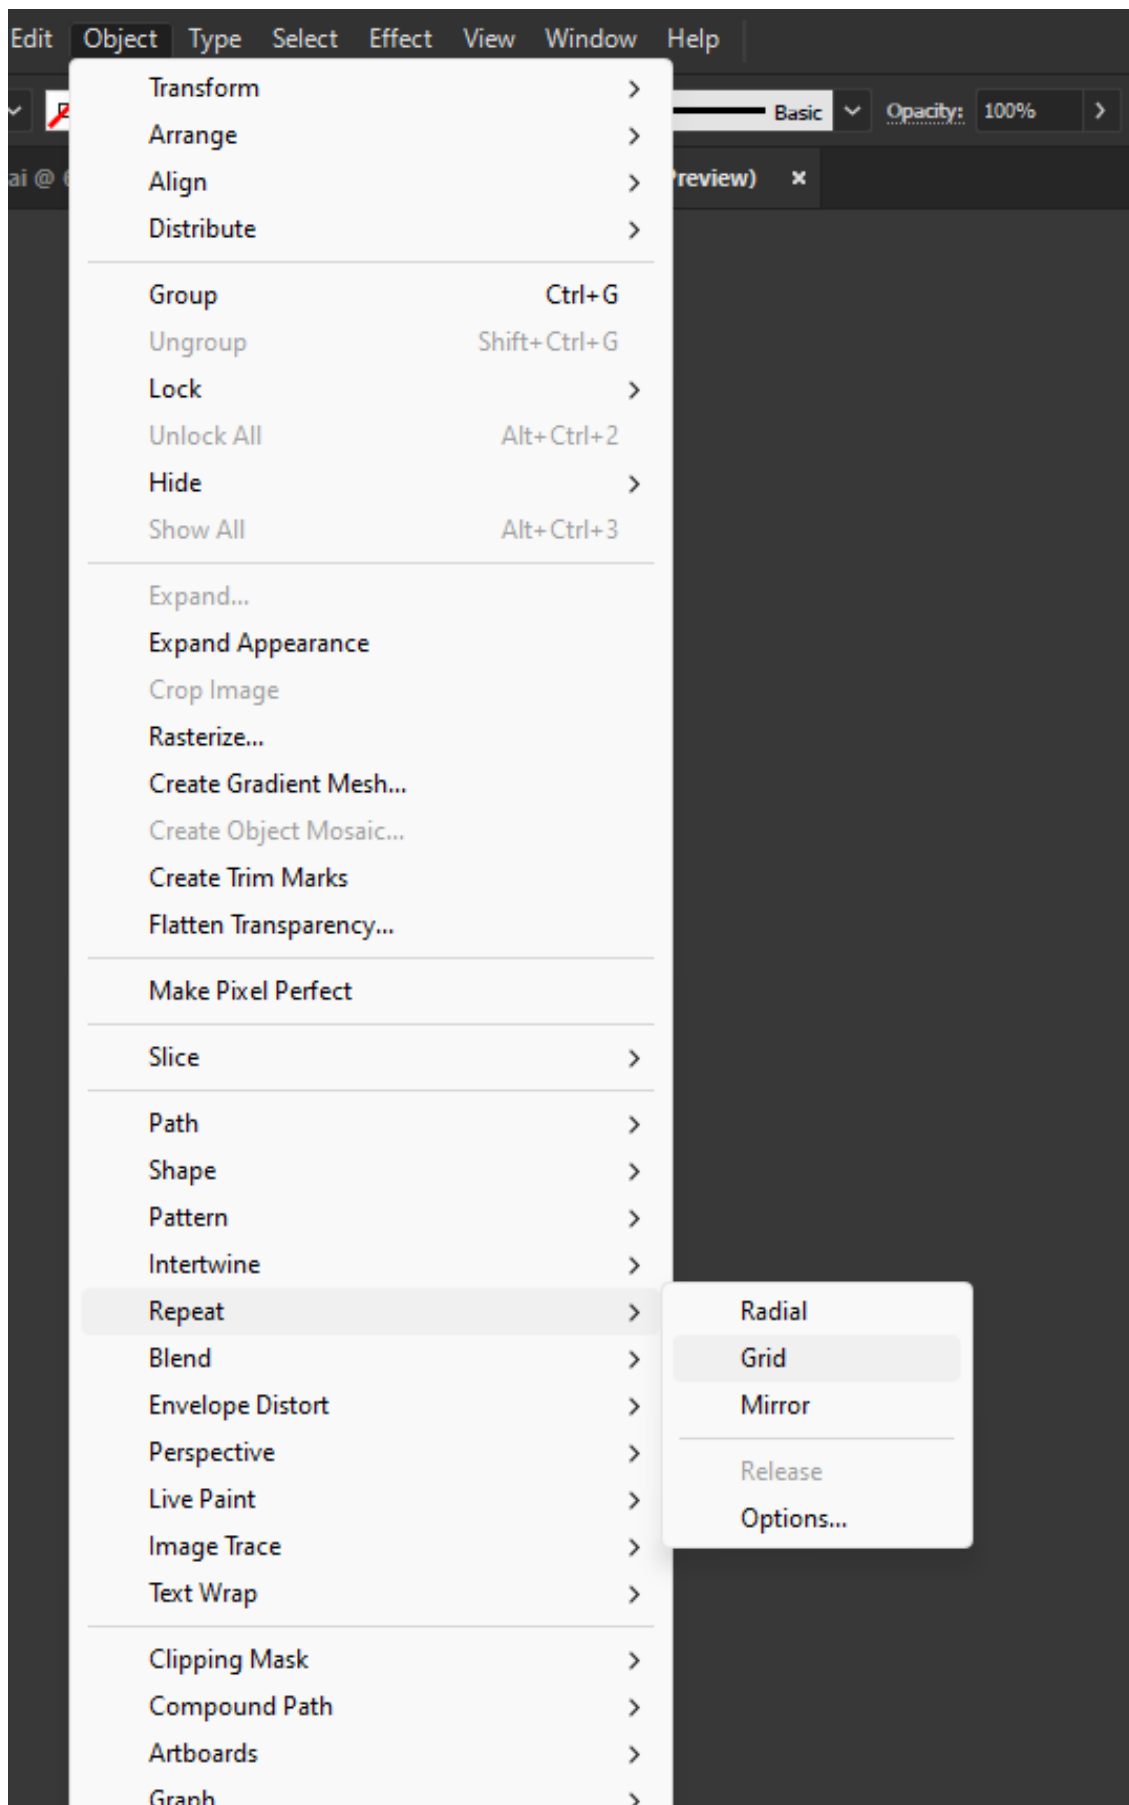

Afrondingstype aangepast

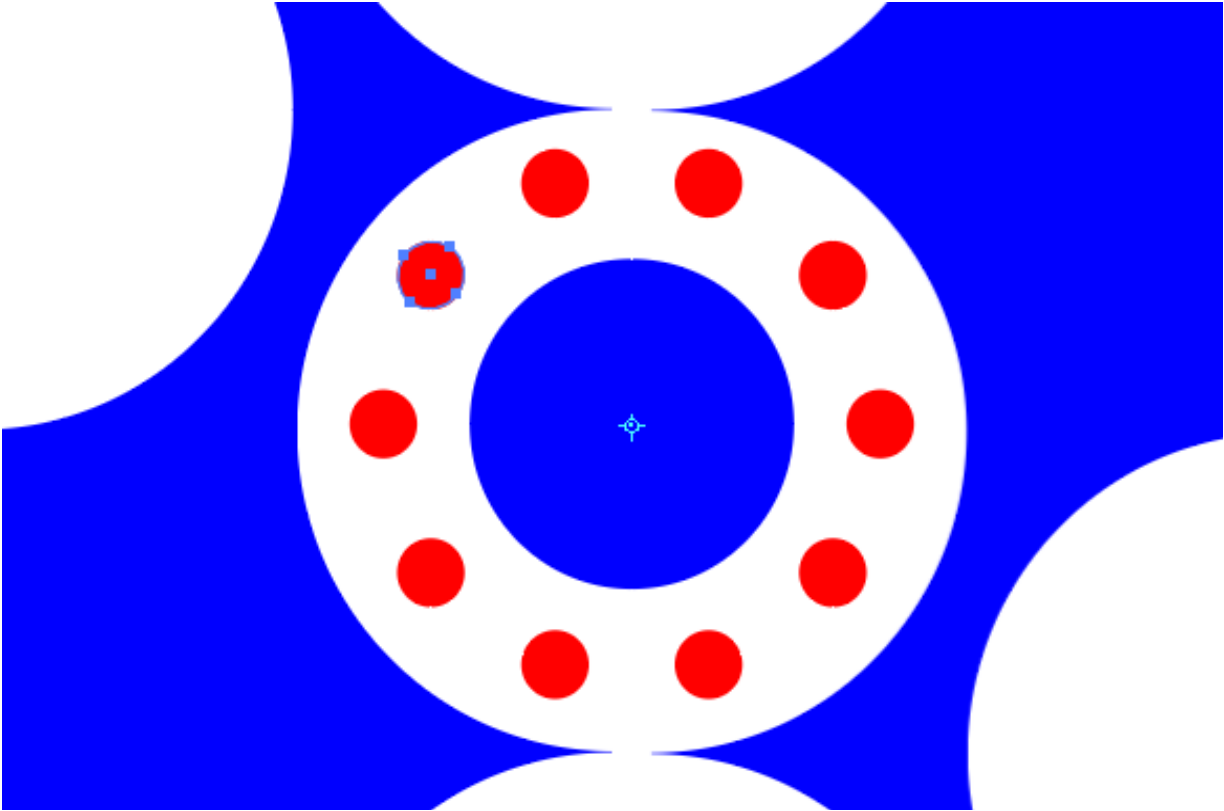

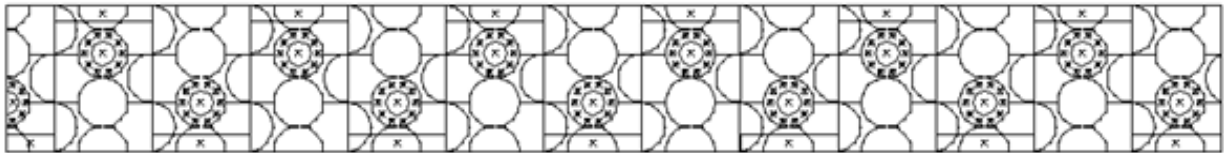

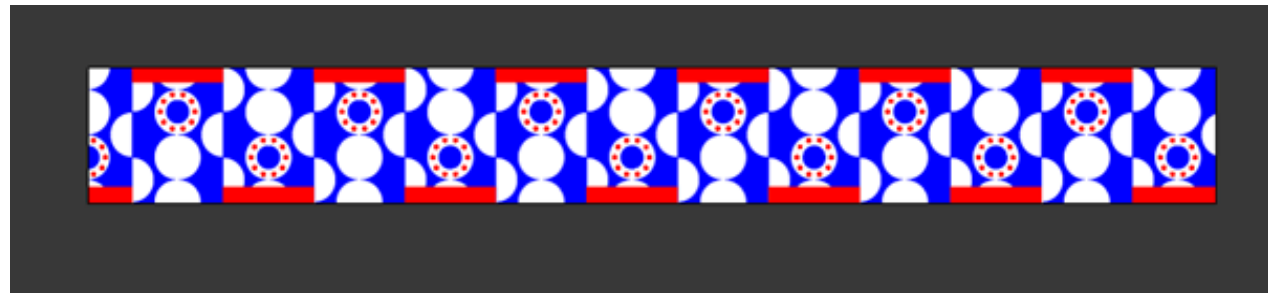

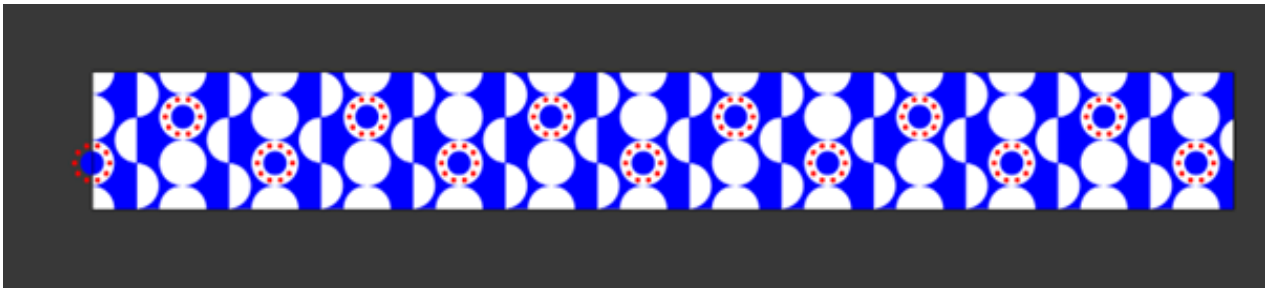

Pathfinder gebruiken

Object > Repeat > Grid

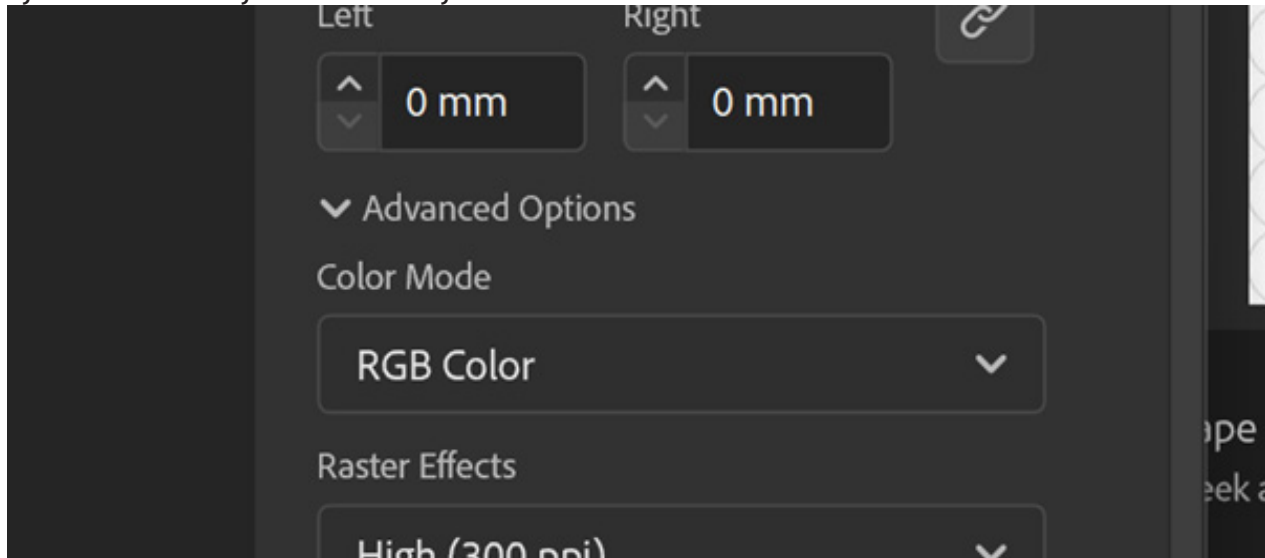

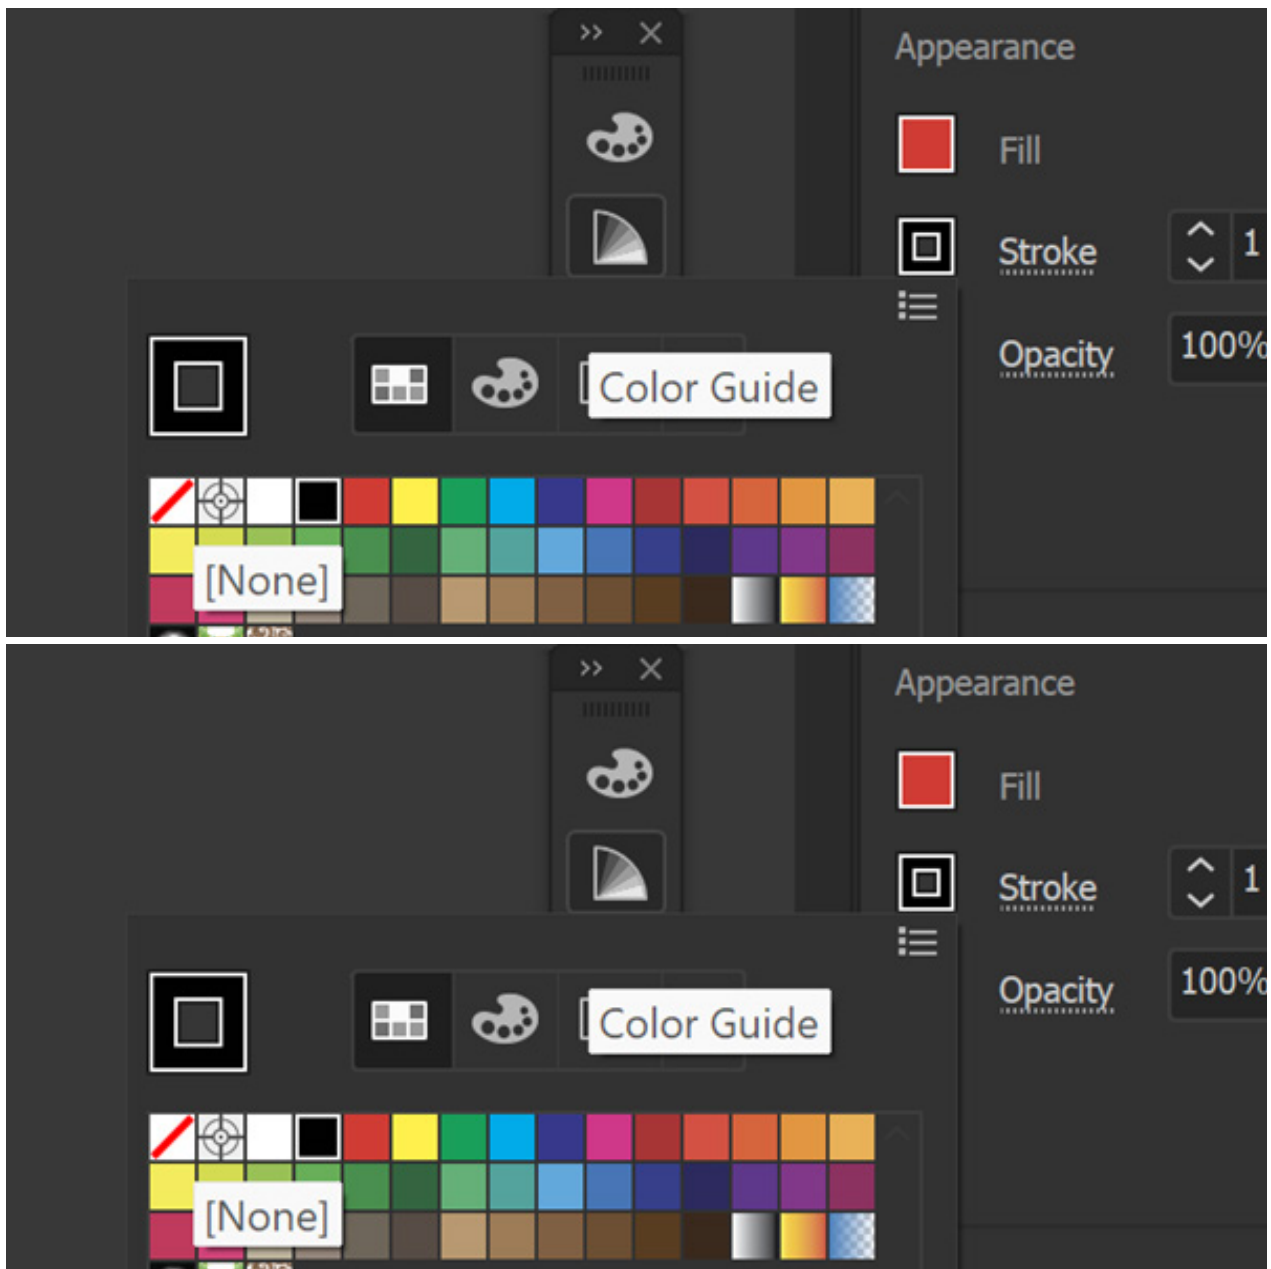

Illu- & foto 1: les 4

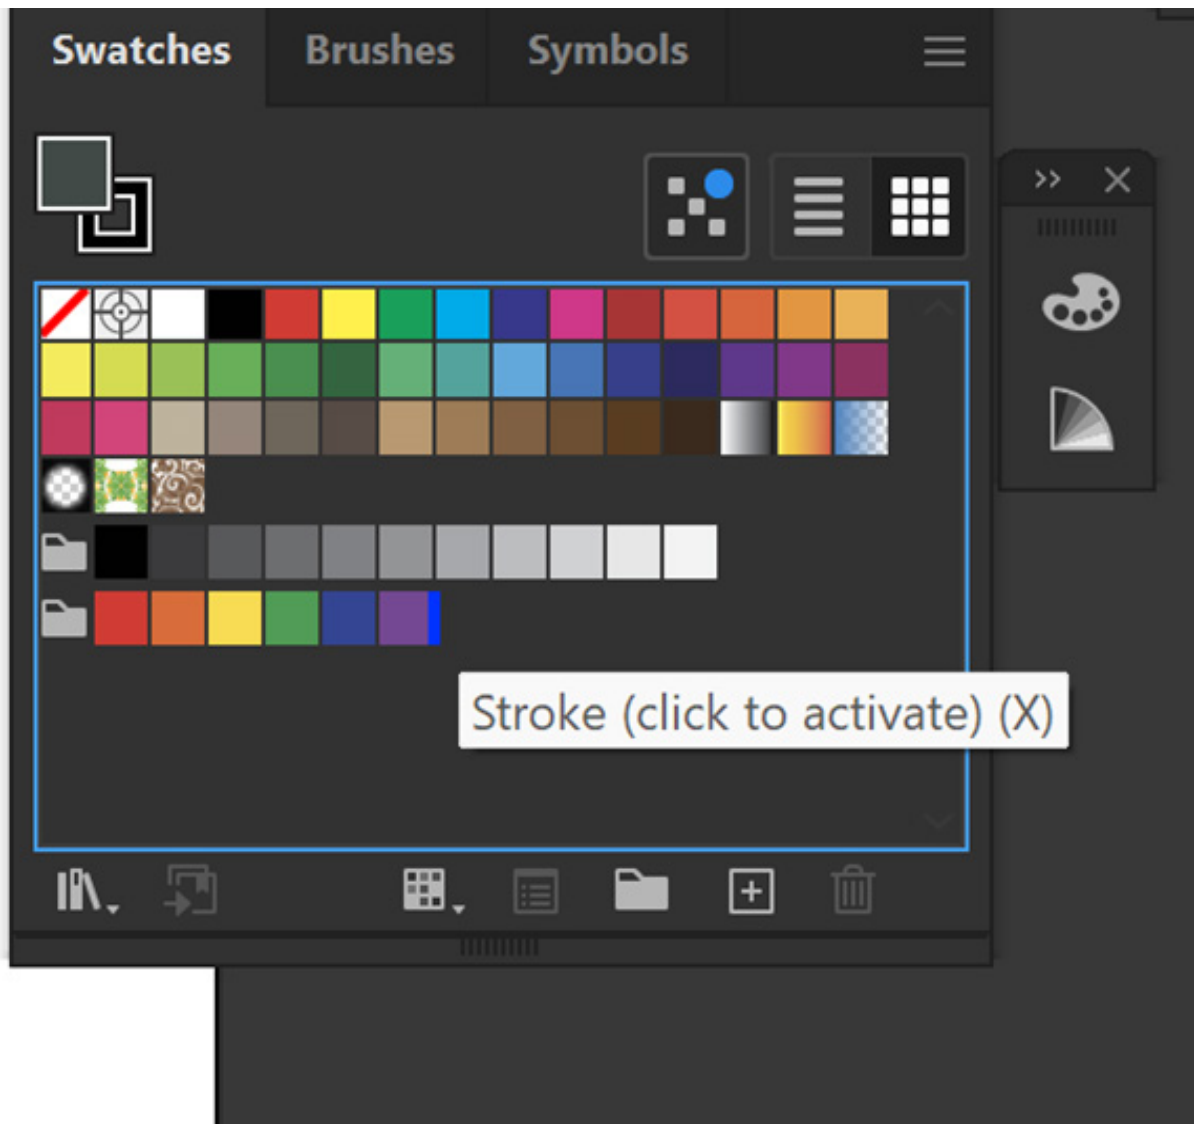

Spelen met kleur
CMYK is print
RGB is scherm

Bij het maken van je bestand stel je de kleurmodus in

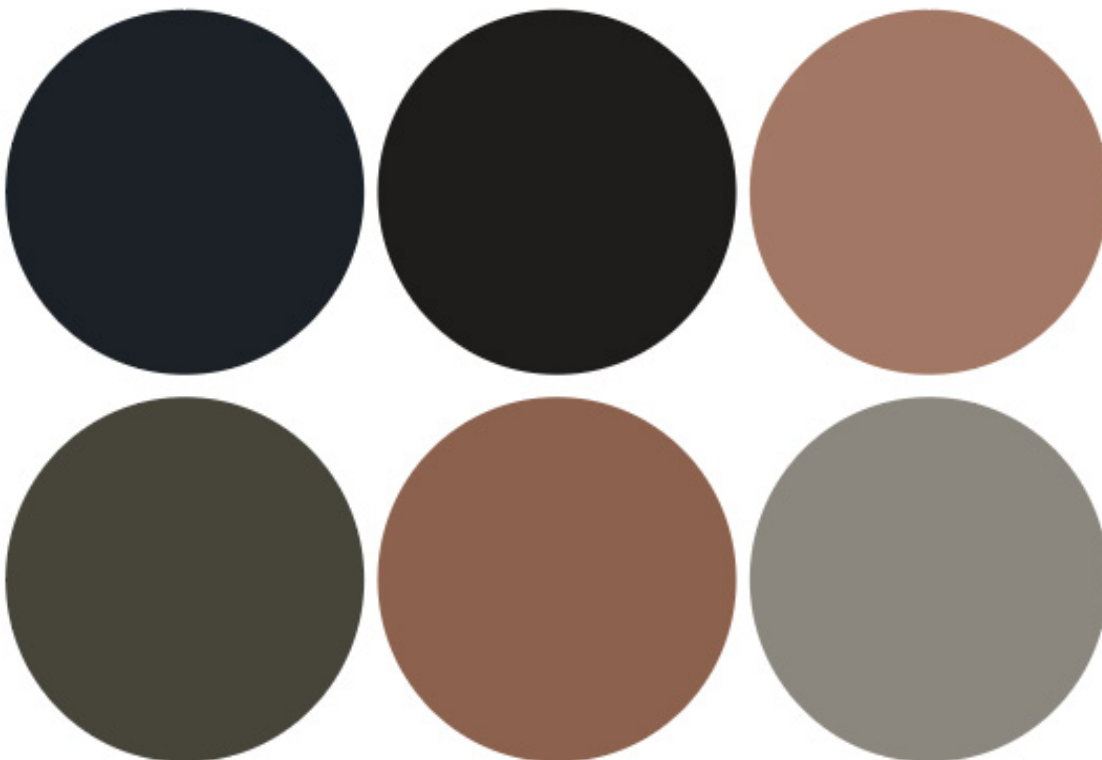

- Lijn of vulling kleur uitzetten kan via de none button

- Kleur opslaan in swatches kan via slepen naar de swatches

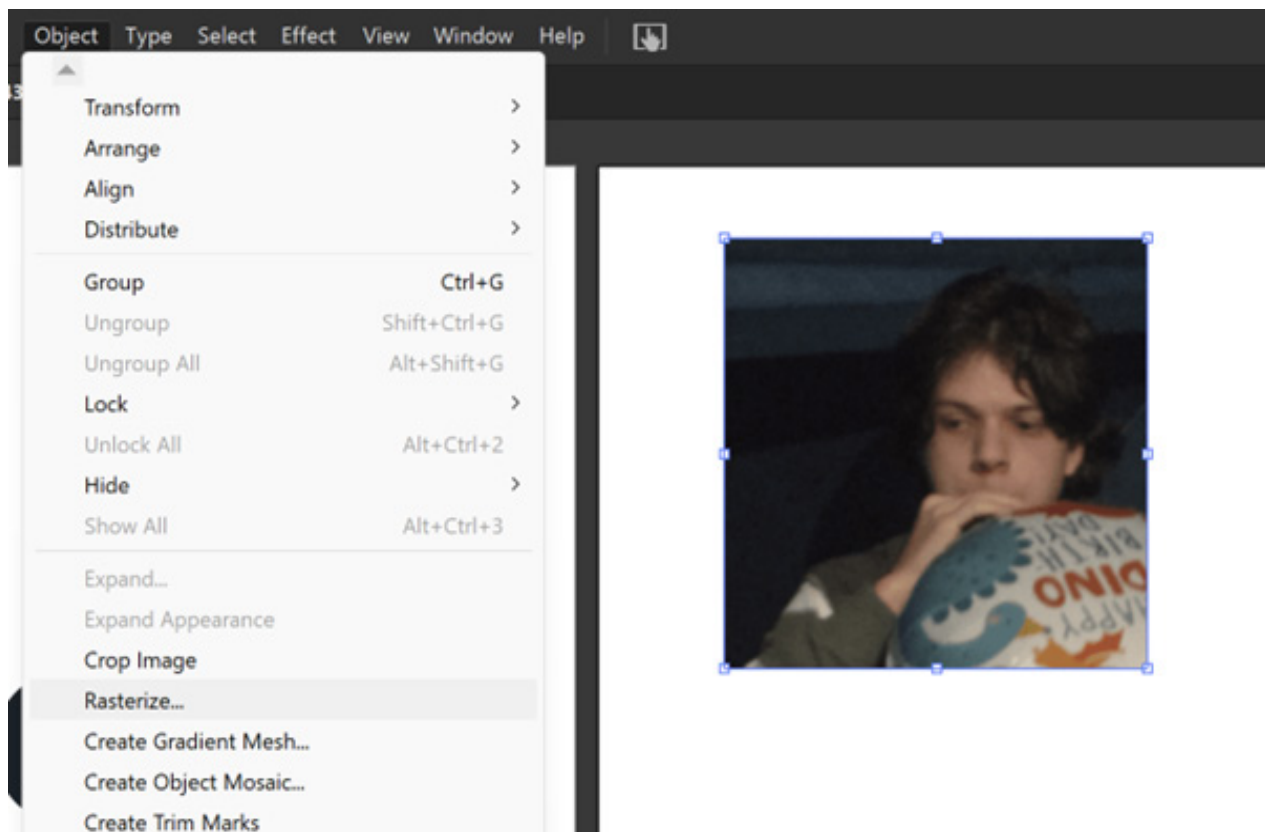

Kleuren halen uit afbeelding

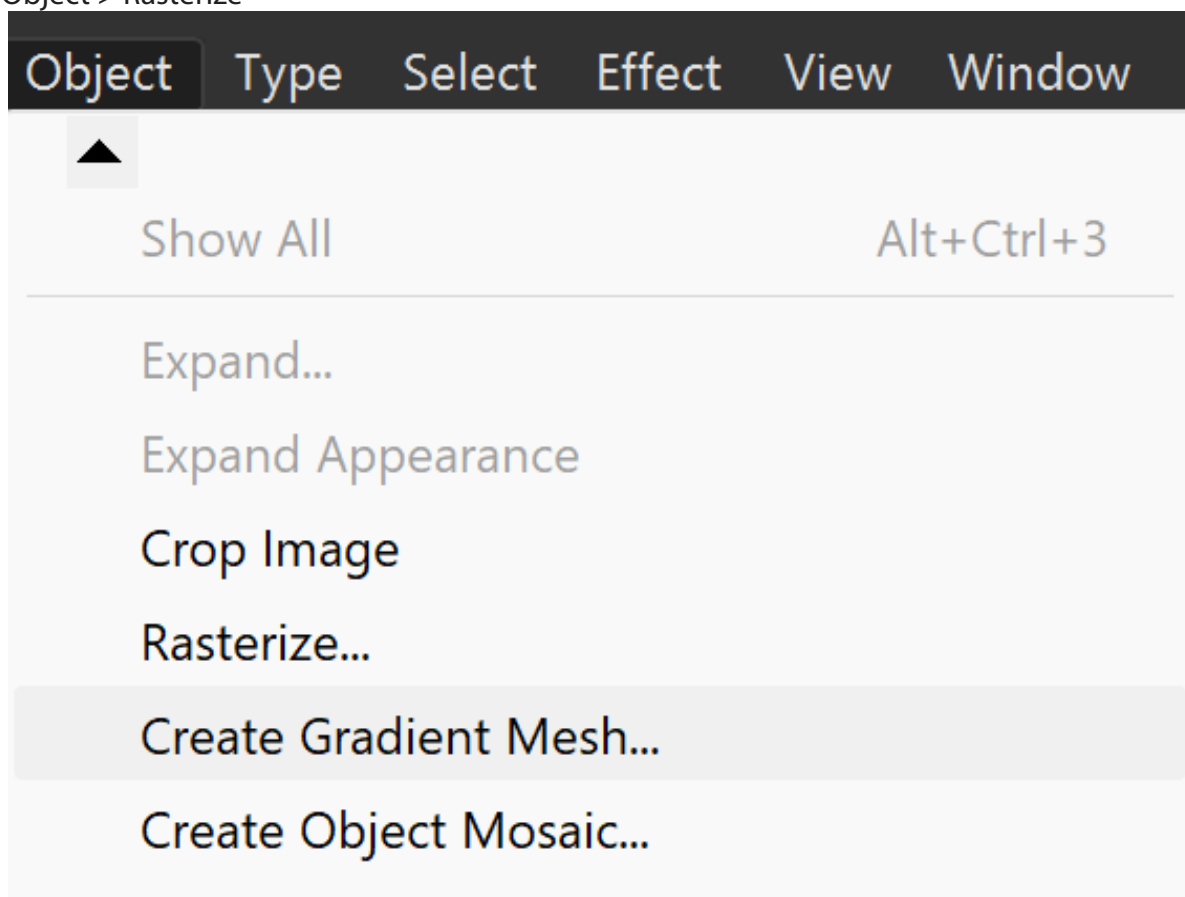

- Je kan via "i" het pipet tool selecteren
- Object zal dan de kleur overnemen waar op gelikt wordt

Van afbeelding kleurenpalet maken

Object > Rasterize

Object > Create object mosaic

Number of Tiles

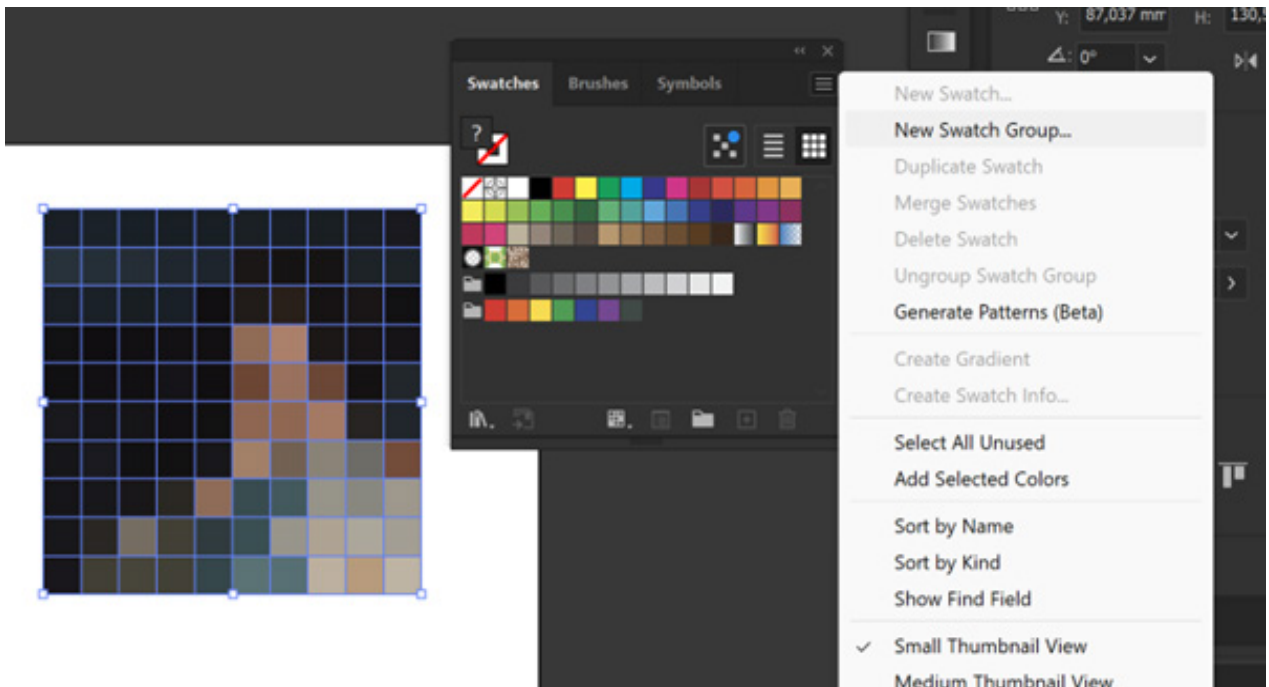

Width: 10

Height: 10

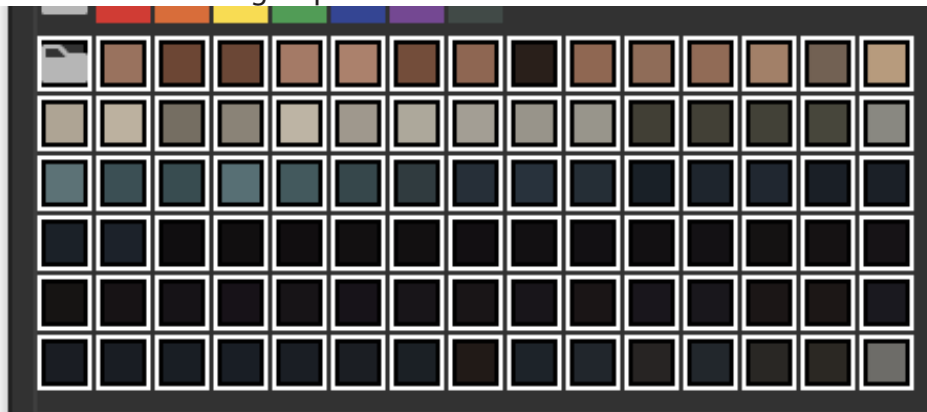

- Hoeveelheid tiles

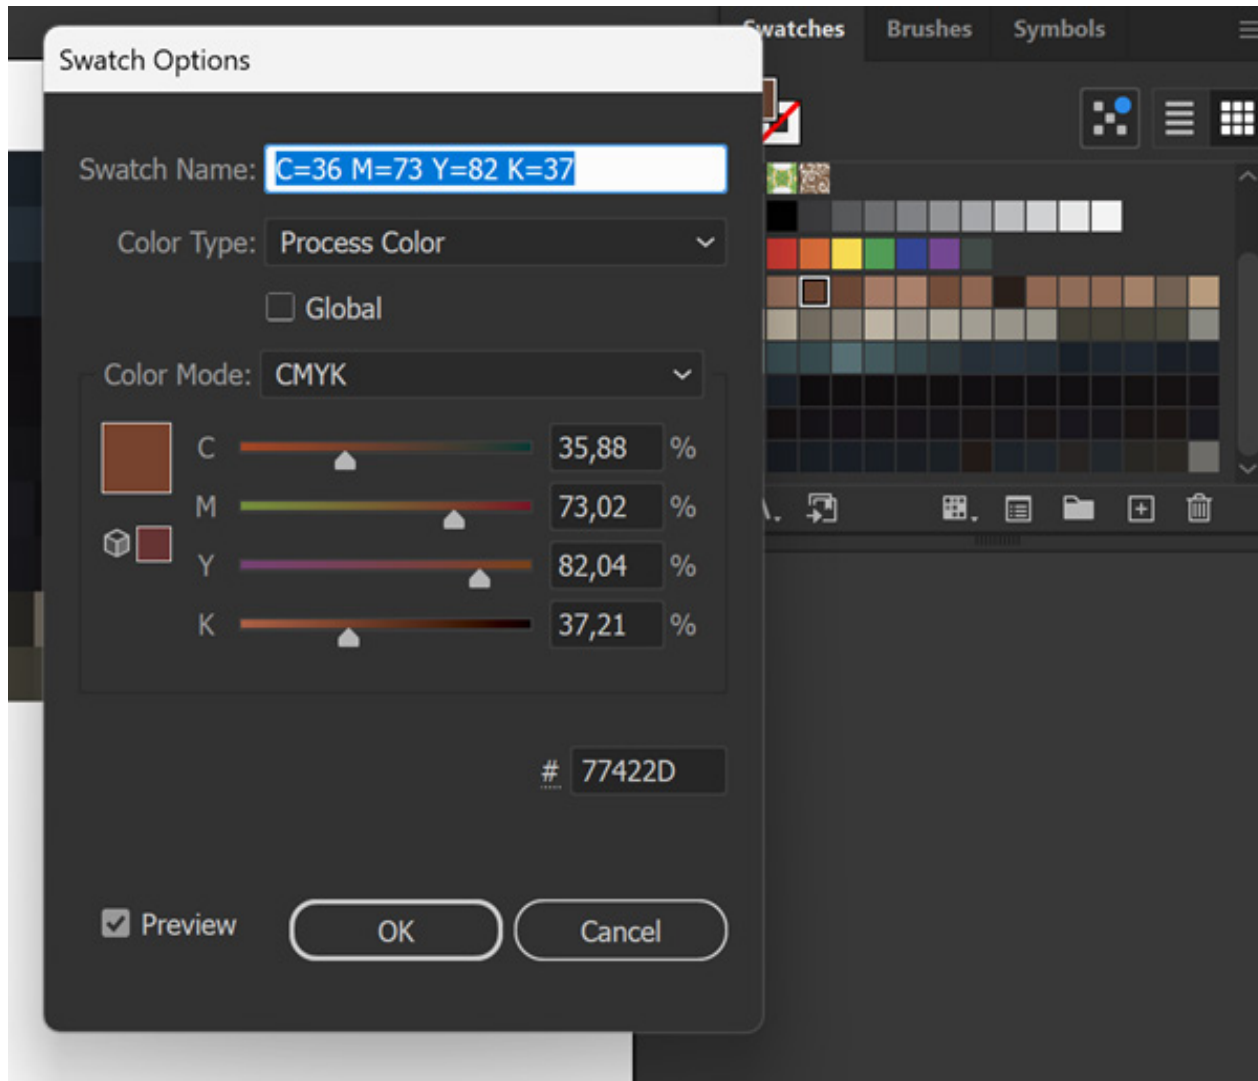

Tiles naar swatches

- Alles selecteren
- Window > Swatches
- New swatch group

Kleur aanpassen en kleurcode krijgen

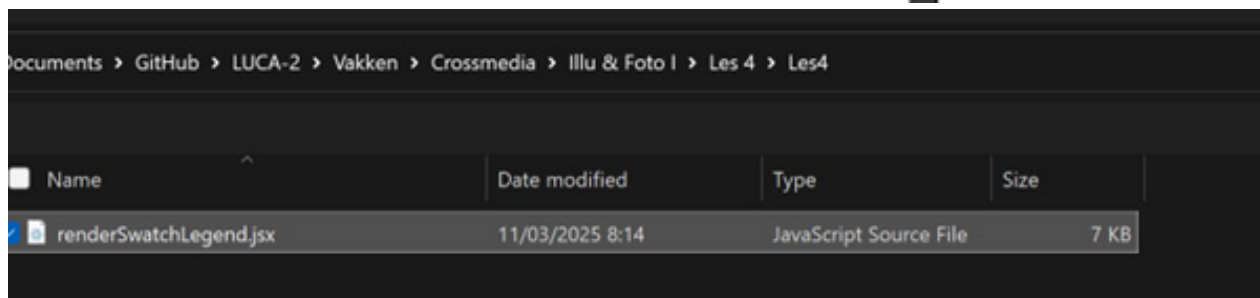

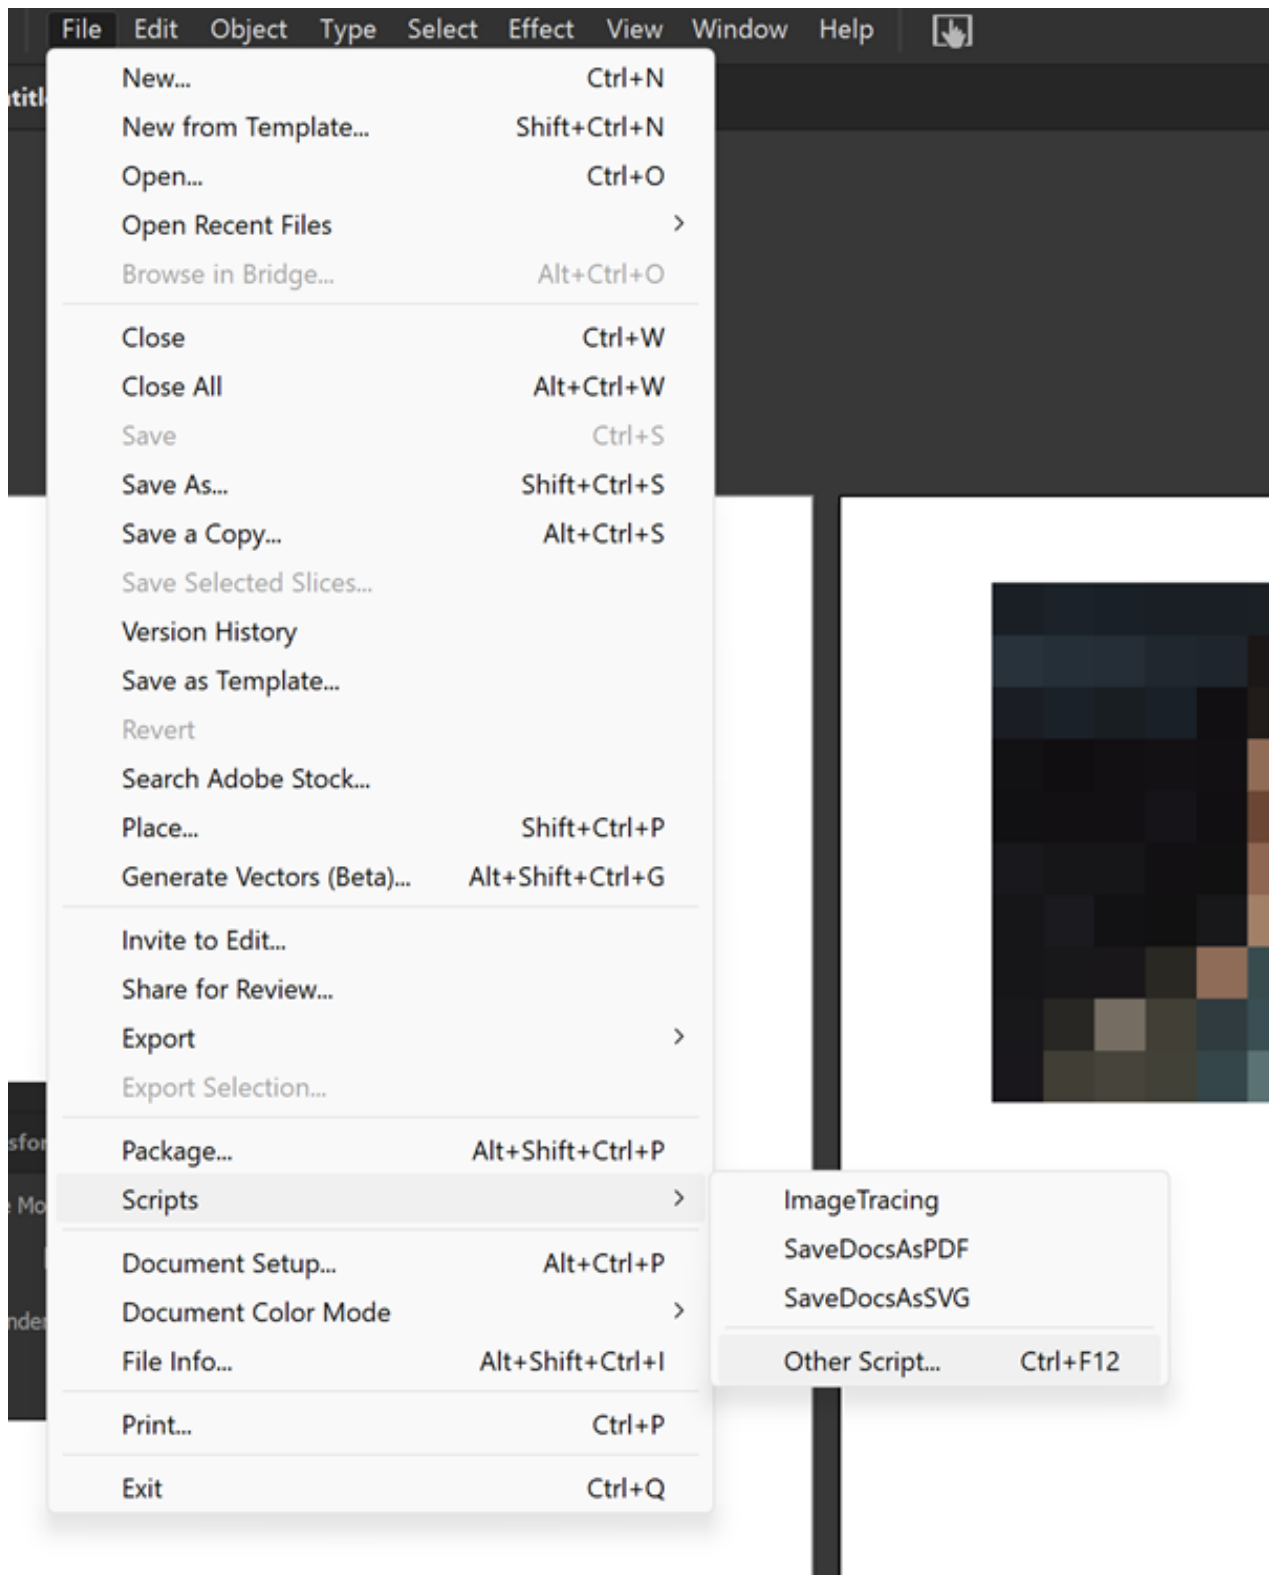

- Kleurcode handig om alle kleuren in alle ontwerpen in verschillende software
- dezelfde kleurcode toe te passen

Alle kleurcodes genereren

- Enkele kleurcodes selecteren

- Script selecteren

Adobe color wheel

<https://color.adobe.com/create/color-wheel>

RGB kleuren voor scherm bedoelt (je kan ze omzetten zelf naar CMYK)

Color Harmony Color Mode
Analogous RGB

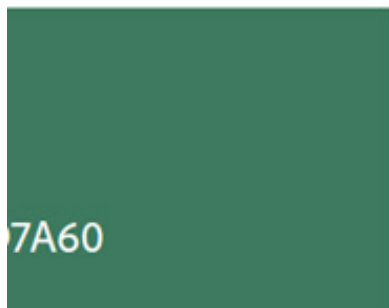

- Kleuren worden geformuleerd bepaald door het main bolletje en de color mode en color harmony

#FA8400	#2F93BA	#00B3FA	#A57137	#3D697A
#504335
